Hirado's All New*

K15

Known for high quality, superior performance and powerful splitting power, the K15 is the latest addition to the Hirado Rock Splitter range. The K15 is an evolution of the existing splitters with upgraded splitting power, better handling and a brand new design. With the K15, rock splitting becomes easier and faster

**Stronger
Splitting Power**

**Improved Framework
Brand New Design**

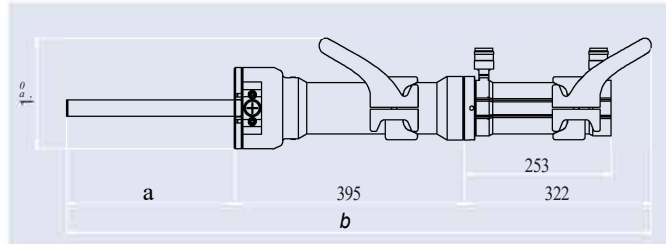

**Easier & Faster
Maintenance**

※Upgrade contents are compared to the former C15

Product Specifications On Backside ▶

I Specifications

Mode/	Wedge							
K15W-40D300	40mm	288mm	12mm	1005mm	32kg	42mm	460mm	4.IMN
K15W-36D240	36mm	228mm	12mm	976mm	31kg	38mm	400mm	4.IMN
K15W-34D200	34mm	188mm	12mm	936mm	30kg	35mm	360mm	4.IMN

I Features

01 Stranger Splitting Power

Increased splitting power by **120%** while keeping the same weight.

02 Easier & Faster Maintenance

Newly designed repulsion receiver framework reduces the time to change the wedge and counterwedge by over **65%**

Newly designed repulsion receiver framework makes greasing **easier**

* Upgrade contents are compared to the former C15

03 Improved Framework Brand New Design

Weight Reduction and Increased Durability due to combining the new/y designed repulsion receiver and frame

A specialized coating process **Prevents Corrosion** and creates an eye-catching design

Specially designed new handles to **Improve Work Efficiency** on various work sites
