15. How to identify a good Anti-Virus?
16. How to know if you have been hacked?

*...And More.*

Please note that the above content and schedule are subject to review.

# RoadMap

Please note that the unique selling point of this package is that the course contents are extracts of relevant topics/skills from Certified Ethical hacker(CEH), Certified Computer Hacking Forensic Investigator(CHFI), International Institute of Certified Forensic Investigation Professional (IICFIP), Certified Information systems Auditor(CISA) and Certified Information Systems Security Professional (CISSP) curricula. The course shall prepare candidates for job opportunities as a Cyber-security Professional, Cyber- Security Auditor or Cyber-security Manager with relevant skills across board (Operational, Tactical and Strategic). The course contents are somehow blended with relevant PM and BA skill sets. The ROI is huge and immediate.

# RoadMap

## STEP 1

Ten (10) days of Online or Onsite instructor-led presentations and laboratory sessions. The lab sessions shall simulate true live environment (work experience). Candidates shall be exposed to and put through the use of relevant latest version of cyber-security tools.

## STEP 2

Two (2) days of Self-paced laboratory sessions with support from an expert (mentor)

# RoadMap

**STEP 3**

Registration, preparation and writing of relevant certification examinations (OPTIONAL) but recommended

**STEP 4**

Access to a mentor for interview preparation and job applications.

**STEP 5**

Referencing from an established company

# SUCCESS *Stories*

**Big congratulations to Lola for securing a role as an Infrastructure Auditor in the Cybersecurity and Infrastructure audit team of a top Bank.**

I want to talk about my experience of the cyber security course. I was part of the first cohort. My background is Accounting and Auditing. I stepped into a cyber risk audit role by chance and I had been looking for the best course to hone my skills. I asked for advice from a lot of people, attended some short courses but nothing prepared me for the depth of Knowledge and information covered by the Tritex Cyber Sec training.

The Cyber security course was well structured and covered a lot of depth, even in areas that I didn't think were related to Cyber e.g forensic accounting.

Post training I got more confident in looking for roles and putting myself forward for relevant vacancies. In Dec 2022, I got a role as an Infrastructure Auditor in the Cybersecurity and Infrastructure audit team of a top Bank.

# FAQ

- **Are your projects real?**  
*All our projects are real projects, focusing on IT and digital sectors*
- **What type of projects will I be working on?**  
*The projects you will be involved in encompass safeguarding an organization's information systems, networks, and data against potential threats and vulnerabilities.*
- **Do I need certification to secure a role?**  
*Although certification will give you an added advantage , practical experience is what is needed to secure a role*
- **I work full time, how flexible is your program?**  
*Extremely flexible. Meetings are in the evenings, and we work your around availability.*
- **How long is the work experience?**  
*The Cyber Security Training Program is a 7-week interactive virtual training program, followed by 2-week project work.*
- **Do you offer Certification?**  
*Upon completion, we provide a CPD-certified certificate.*

# *Meet the* **Trainer**

TRITEK CONSULTING LIMITED

## **GANIYU AZEEZ**

(M.Sc., B.Sc, CCNA, ECSA, CEH, CHFI, CISA, CISSP)
