STEP 2:

Work Experience - Collaboratively working on live projects with candidates to get real life experience.

STEP 3:

Mentorship - Access to a mentor for interview preparation and job applications

STEP 4:

Referencing - Referencing from an established company

SUCCESS Stories

**Big Congratulations to Abbas
Role secured: Scrum Master**

Hi Mama Hawk, just like yesterday I still remember vividly calling you from the blues to make enquiries on how I can attend training sections as an intern in Tritek!!! I was directed to you by a friend and you responded so well that I signed up immediately,fast forward to now,I have started as a Scrum master in an amazing organisation and you are the foundation!!

Thank you for this life changing journey and thank you for all you do!! You made hard work seems so easy and LMS helped me tremendously.To the interns, just trust the process, use LMS and believe in yourself .God bless!!!

**Big congratulations to KP for
securing an Agile delivery Role.**

I genuinely appreciate you from the depth of my heart for your contribution, both personally and as part of the Tritek team, to my now very successful career. I was part of the Jan 2022 PM/BA training batch and then transitioned into Scrum, which has now completely changed my life today. You also privileged me with an opportunity as a mentor and support for the Scrum Master course delegates, and you gave me a platform to host a Zoom knowledge Sharing session on AI which had 800 attendees. You sure are the mentor extraordinaire.

To the glory of God, and thankful to you and the Tritek team, which I also already see myself part of, I signed a new contract as an Agile Delivery Lead/ Scrum Master for a Public sector (without an interview) and commencing the role on Monday so that I would be covering two roles, with one, a 100% remote.

FAQ

- **Are your projects real?**
  All our projects are real projects, focusing on IT and digital sectors

- **What type of projects will I be working on?**
  You will be working on digital and IT projects, with a primary emphasis on facilitating the successful implementation of the Scrum framework and ensuring steadfast adherence to its principles and practices by the Scrum team.

- **Do I need certification to secure a role?**
  Although certification will give you an added advantage , practical experience is what is needed to secure a role

- **I work full time, how flexible is your program?**
  Extremely flexible. Meetings are in the evenings, and we work your around availability.

- **How long is the work experience?**
  The training program spans a duration of 8 weeks, with a dedicated period of 3 weeks allocated for project work.

- **Do you offer Certification?**
  Upon completion, we provide a CPD-certified certificate.
