

JUST LIKE YOU

We're so good at pretending, you and I
You know I know just what's on your mind
Never say, let me read between the lines
Though you know I know just what I'll find

You see yourself when you look in my eyes
I know the truth hidden within your lies
and you know it's true
you don't like me 'cause I'm just like you

I could keep on forever playing this game
I know that you're feeling just the same
I've been told that opposites attract
So we'll stay apart and face the facts

You see yourself when you look in my eyes
I know the truth hidden within your lies
and you know it's true
you don't like me 'cause I'm just like you

Though we both know it - it remains unsaid
Both of us holding back what's in our heads
and you know it's true
you don't like me 'cause I'm just like you
