## DESCRIPTION OF THE EVENT

The Annual ACCIS Conference is the premier event in Europe for professionals in credit information services. Held annually in May or June at various locations across Europe, the conference attracts leading experts and decision-makers in the field.

Although the conference was held remotely and in hybrid mode during and shortly after the global pandemic, the event has now returned to its original format: face-to-face.

The conference features speakers such as top policymakers, including European Commissioners, international regulators like Directors from the World Bank and the International Committee on Credit Reporting, as well as European legislators, including Members of the European Parliament (MEPs), and supervisory authorities like Governors of Central Banks. Additionally, the conference attracts industry leaders, including CEOs and C-level representatives from credit bureaus, financial services providers, top consulting firms, innovators, and representatives from think tanks, academia and consumers

### Previous speakers have included:

- Didier Reynders, Commissioner for Justice
- Axel Voss, Member of the European Parliament
- Tomislav Sokol, Member of the European Parliament
