DESCRIPTION:

True 5-5-2 is a homogeneous pelleted fertilizer specially formulated for organic fruit and vegetable crop production.

USAGE:

This product should be used as part of a complete nutrient management program. True Organic Products are designed and manufactured as soil amendments and should be thoroughly mixed into the soil. True Organic Products have been processed in a manner that eliminates human pathogens. However, in order to further limit any risk, all users shall avoid product contact with the edible portion of the plant. Consult your agronomist or a True Organic Products Fertility Specialist for specific agronomic recommendations.
