Argus[®] 4: Handle

Introduction

Simply place the handle on the bottom of any Argus[®]4 and then screw into place using the captive screw. This handle makes it possible to carry the Argus[®]4 with one hand

The handle is made from a red flame-resistant plastic so that it can withstand the same extreme temperatures as the camera.

It is hollow so lightweight and can be attached to a neck strap for easy storage/access. It is ergonomic providing a rubber grip for comfort.

The captive screw has been used so that the Handle can be easily fixed or removed from the Argus[®]4. The handle can only fit one way so there is no confusion.

Physical Data

- Material: Radel[®]-R5100 over moulded with Santoprene[®]
- Colour: Red
- Dimensions: Handle Length - 165mm
- Weight: Handle Weight - 171g

Order Code.

- P7030HA
