

AA battery pack

The AA battery pack adds additional flexibility to the Argus[®] Mi-TIC camera, allowing it to operate for over 4 hours on 7x LR6 AA Alkaline batteries at room temperature. It features a thumb operated latch that allows it to be easily removed and re-attached to the camera.

Two additional thumb operated latches, which only operate when the pack is not attached to the camera, allow the pack to be opened so that the batteries can be replaced. The unit contains a removable carrier that allows the battery cells to be easily exchanged.

The pack is designed to prevent it from being placed in the charging station either on its own or while attached to a camera

The Argus[®] Mi-TIC camera battery bar is fully functional with the battery pack
