

# CT Terminal Die Crimping Tools 11707-1 (MS90413-1A), 11545

- Meets all performance requirements for M22910 and M22520
- Permanently attached dies
- Cycle controlled

The Astro **11707-1** (miniature) and **11545** (standard) crimping tools are versatile and easy to use.

Among their many applications, these durable, all-steel tools crimp MS-25036 terminal lugs, MS25181 splices, MS25274 endcaps and other types of fittings.

The **11545** (standard) crimps 12-10 through 26-24.

The **11707-1** (miniature) crimps 16-14 through 26-24. The 11707-1 is especially useful in hard to reach places where space is limited.

Both the **11707-1** and **11545** have selector knob adjustments, allowing a choice of precise crimp settings over a wide range of applications.

These tools are equipped with retractable locators for the positioning of terminal lugs and wire. When crimping splice fittings the locator can be easily adjusted to its retracted position. The same inline die system combined with the positioner ratchet found in Astro's other C-Frame tools are featured in these terminal crimping tools.

Astro recommends the periodic gaging of all its tools, p/n 612406 for gaging the **11545** and 621069 for **11707-1**.

The **11707-1** is 8 ½ inches long and weighs 14 ounces.

The **11545** is 10 ½ inches long and weighs 29 ounces.
