SD-691 PAVEMENT MARKING SYSTEM

The **SD-691 Pavement Marking System** provides a safe and efficient method of applying **3M™ Stamark™** High Performance pavement marking tape to road surfaces. The SD-691 is designed to be a ride-on self-propelled pavement marking tape application system. Positive application and cut-off is achieved by the specially designed, heavy duty applicator.

### TAPE SPECIFICATIONS

- **Designed for 3M™ Stamark™ High Performance Tape.**
- Tape Width: Min: 4"; Max: 12"

### SYSTEM SPECIFICATIONS

- Skip line controller
- Consistent tape tension control (regardless of roll size)
- Micro steering for accurate tape placement
- Adjustable rear drive allows tape application on either side – within 6" of a curb
- Tape Storage – rear deck holds up to (2) rolls of tape
- Fold down overhead light bar
- On-board air compressor with tank
- 25 horsepower Kohler engine
- Engine shut off if operator is not on the platform (unless in neutral with brake set)

### GENERAL INFORMATION

- The **SD-691** is a modular, high productivity self-propelled system for applying pavement marking tape. The system combines safety with productivity by bringing your operators off the road, reducing their exposure to traffic.
- Robust, fixed knife cutting mechanism

See Straub for engineered tape solutions in a variety of industries, from automotive and packaging to solar. If we don't have the tape applicator you need, we'll design, build and install a custom solution for you.

- Asphalt and concrete surface application

- Variable speed hydro-static transmission
- Maximum recommended application speed, 5 mph
