Proposal for the installation of a video intercom system at the pedestrian entrances, which will allow residents to open access from inside their apartments and accurately see who is requesting entry. This measure represents a significant improvement for the safety of both the residents and the community as a whole.

The total cost of the system amounts to 10.062,36 €. If approved, an extra fee of 125 € per apartment will be established (the other 50 % will be paid from the community funds), payable during the first half of December.
