VIBORG ANIMATION FESTIVAL 2019

VELKOMMEN TIL VIBORG ANIMATION FESTIVAL 2019

**Så er det blevet tid til Viborg Animation Festival!
Festivalen afholdes, i sin nuværende form, for
7. gang og er for alvor blevet Danmarks største
internationale animationsfestival.**

Gæstelandet i år er Sydkorea. Et land vi kender for K-Pop, Samsung, Hyundai og den nu gennem generationer fastlåste politisk-geografiske situation omkring Nord- og Sydkorea. Men Sydkorea er også et land præget af en fantastisk dynamik, et eventyrligt køkken, en folkelig kærlighed til contemporary art og en kultur, der spænder fra landlig traditionsrig feudal fortid til et højteknologisk moderne bysamfund præget af ikoniske neondraperede skyskrabere. Sydkorea er omrent dobbelt så stort som Danmark, men huser en befolkning, der er omkring 10 gange så stor.

Igennem et solidt samarbejde med Innovation Center Denmark ved Den Danske Ambassade i Seoul kan VAF 2019 præsentere det ypperste af koreansk animations- og illustrationskultur, en omfangsrig udstilling af koreansk animationskunst i samarbejde med Ilmin Museum of Art og nogle utroligt spændende projekter inden for temaet Expanded Animation.

Temaet for VAF 2019 er Human Impact. Festivalen ønsker hermed som kulturinstitution af fastholde og styrke den vigtigste dagsorden af alle: aldrig, i den korte tid vi mennesker har domineret Jorden, har vi stået over for en så epokegørende udfordring – og vi må, uanset vores politiske overbevisning, hurtigt forstå de miljømæssige konsekvenser af den måde, vi vælger at leve vores liv. Human Impact-temaet vil på forskellig vis afspejle sig i både programlægning og begivenheder forbundet med festivalen.

Festivalens hovedprogram vises i Fotorama/Nordisk Film Biografer. Men festivalens aktiviteter, udstillinger og begivenheder udspiller sig over hele byen. Herværende program skulle, sammen med VAF App 2019, gerne give dig et solidt overblik over hvordan du får mest ud af festivalens mange muligheder.

VELKOMMEN TIL VAF 2019!

**Once again it's time for Viborg Animation Festival!
The festival, in its current form, is held for the 7th
time and has truly become Denmark's biggest
international animation festival.**

The guest country this year is South Korea. A country known and renowned for K-Pop, Samsung, Hyundai, but also for the political tension around that has been stuck for generations. But South Korea is also a country characterized by amazing dynamics, an adventurous cuisine, a deep passion for contemporary art, and a culture ranging from rural traditional feudal past to a high-tech modern urban cityscapes characterized by iconic neon-draped skyscrapers. South Korea is about twice the size of Denmark, but is home to a population about 10 times bigger than Denmark's.

Based on a strong collaboration with Innovation Center Denmark at the Danish Embassy in Seoul, VAF 2019 is very proud to present the best of Korean animation and illustration culture, a comprehensive exhibition of Korean animation art in collaboration with Ilmin Museum of Art and a wide array of exceptionally exciting projects within the theme Expanded Animation.

The theme for VAF 2019 is Human Impact. As a cultural institution, VAF strives to maintain and strengthen the most important agenda of all: never, in the short time humans have dominated the Earth, have we faced such an epochal challenge - and we must all, regardless of political persuasion, quickly understand the environmental consequences of the way we choose to live our lives. The Human Impact theme is reflected in numerous programs and events related to the festival.

The film program is screened in Fotorama / Nordisk Film Biografer, but the festival activities, exhibitions and events take place all over the city. This program, together with the VAF 2019 app, will introduce you to the events, give you a thorough overview and inspire you to make the most of the immense opportunities of the festival.

WELCOME TO VAF 2019!

HUMAN IMPACT

The theme for Viborg Animation Festival 2019 is "Human Impact". Never has human being faced a more important challenge than the one our generation is facing right now. Regardless of race, gender, nationality, political persuasion and religious beliefs, a balanced habitat is the most important prerequisite for continuous human existence.

The VAF 2019 theme seeks to remind us that we as humans now must face a choice and act on it today; do we wish to continue ranking economic growth above nature and climate, or will we understand that the balance with nature is a crucial foundation for our own existence?

Economic growth is important. Especially for the parts of the world that are not as well developed as we are. The question is; if economic growth is a prerequisite for the existence of society, is it then still possible to create and support sustainable economic growth?

We must succeed in this mission. It requires that we realize the problems. That we understand and accept the facts. That we are accurate in our dialogue about difficult topics. That our common tales describe how we can overcome the task. And that we communicate and tell the stories of how we succeed.

This is exactly what VAF wants to bring into focus with the theme "Human Impact".

Temaet for Viborg Animationsfestival 2019 er "Human Impact". Aldrig har mennesket stået over for en vigtigere udfordring end den, vores generation møder netop nu. **Uanset race, køn, nationalitet, politisk overbevisning og tro, er et habitat i平衡 den allervæsentligste forudsætning for fortsat menneskelig eksistens.**

Temaet på VAF 2019 søger at minde os om, at mennesket netop nu står over for et valg, vi må og skal træffe: Vil vi fortsætte med at sætte økonomisk vækst over naturen og klimaet, eller vil vi forstå, at balancen med naturén er et afgørende fundament for vores egen eksistens?

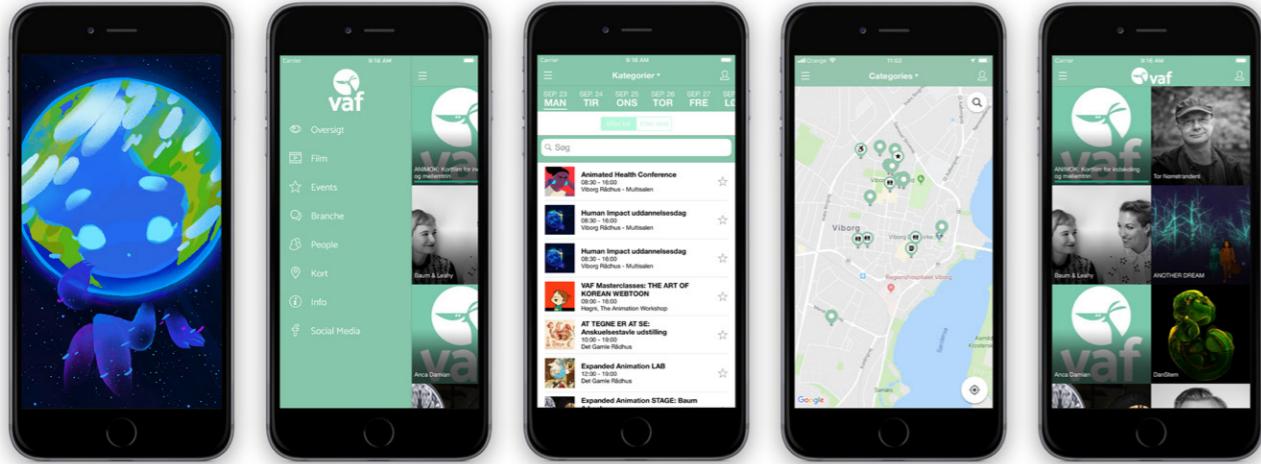

Økonomisk vækst er vigtigt. Særligt for de dele af verden, der ikke er så langt i udviklingen som os. Spørgsmålet er, om det er muligt at skabe og understøtte en bæredygtig økonomisk vækst, hvis økonomisk vækst er en forudsætning for samfundets eksistens?

Vi skal lykkes med opgaven. Det kræver, at vi indser problemerne. At vi forstår og accepterer facts. At vi er præcise i vores dialog om svære emner. At vores fortællinger beskriver, hvordan vi overkommer opgaven. At vi aktivt fortæller og formidler historierne om, hvordan vi lykkes.

Det er netop dette, VAF ønsker at talesætte med temaet "Human Impact".
