

ASAC TRIAL

Scandinavian Livermet Study

NEWSLETTER

-March 2018

We have now reached end of March, and are past the first months of inclusion to the study.

Denmark received approval from the authorities in March, but unfortunately has to wait to June before including due to labeling restrictions.

Inclusion

Stockholm, Lund, Linköping, Trondheim, and Bergen all have included their first patients, per now that's over 20 patients randomized. We still have a way to go to increase the inclusion rate, but it's a good start! We hope that we in the next months can increase the inclusion, as

each site now fully begins to include.

Do not hesitate to contact the study nurses in Oslo if any problems/questions occur.

Web/Facebook/Twitter

The trial webpage asac.no is continuously updated. Please follow the study on Facebook and Twitter. Search for ASAC/ASAC trial and add us.
