Covid 19

First of all we hope you all are fine after these last tough months that we have been through. We see that the inclusion rate, naturally, has decreased during this period. We hope that with more control over the virus, all sites that had to use the resources on COVID-19 can now start including again. We need to include all eligible patients during the next months. We sincerely ask you to keep on doing the good work, to not miss any patients.

Study medication

The expiry date is March 2022 for the present batch of trial medication (IMP). The next delivery is planned in January 2021. In order to use already produced IMP, Viedoc will allocate KIT-numbers. The KIT-number to patients will therefore not always be the same as the previously delivered boxes. Be aware of this in Viedoc, and use the allocated KIT-number in Viedoc.

Finally, we are always available to discuss or help out if there are any questions regarding the trial or inclusion of patients. Please do not hesitate to contact us.

We hope you all will have a nice, warm, and relaxing summer!
