JUNE 2023

Status in study

All sites are working with the last patient follow-ups in the study. Some sites are completely finished, and some sites only have a few patients left. In Oslo, we have around 38 patients left to follow up – last one Jan 2025. Keep up the good work of collecting CT results, CEA and QoL on the remaining patients.

New batch of IMP

All sites have received new study medication. Please contact Cecilie Moe if you have any questions regarding the new batch or allocation in VieDoc.

E mail: cecmo@ous-hf.no

Complete eCRF's in Viedoc

Going forward, it will be important to collect all available data on all patients in Viedoc, and answer queries for your site.

All eCRFs need to be signed when they are completed. This has to be done by the PI at every site. Everything needs to be in

place before we can close the eCRF's for the patients who has completed the study.

Documents for TMF

We are missing some documents in the Trial Master File. We kindly ask all sites to send over completed **screening log**, updated **delegation log** and all **monitor logs** to frbhan@ous-hf.no.

If you have any questions regarding the study or registration in Viedoc, please contact our new study nurse in Oslo, Frida at frbhan@ous-hf.no or telephone +47-23073293 at daytime.

We would like to thank you for all the good work with the study, and wish you happy summer holidays!

Best regards,

The ASAC team
