November 2024

Last follow ups

We are approaching the final months of the ASAC trial. We kindly ask every site to go through the eCRF's in VieDoc to solve queries and collect remaining data on the patients, and fulfill the last visit data. All forms need to be signed by the PI at every site when they are completed. We have started to close eCRF's for patients who have completed the study at every site. LPLV needs to be done before end of December 2024.

Some sites are working with the last patient follow-ups in the study. Some sites are completely finished, and some sites only have a few patients left. Keep up the good work of collecting CT results, CEA and QoL on the remaining patients.

Molecular analysis

Remember to fill in in the forms regarding molecular analyses.

Updates in Viedoc

Due to a minor update in viedoc, all sites have to accept the update under messages. If you have filled out the survival follow-up form, you will need to press edit and save the form.

If you have any questions regarding the study or registration in Viedoc, please contact our new study nurses in Oslo, Eline and Asle at eliula@ous-hf.no / aslrud@ous-hf.no or telephone +47-23071173 at daytime.

We would like to thank you for all the good work with the study!

Best regards,

The ASAC team
