PERSONAL SOUND

MOBILE APP DEVELOPER

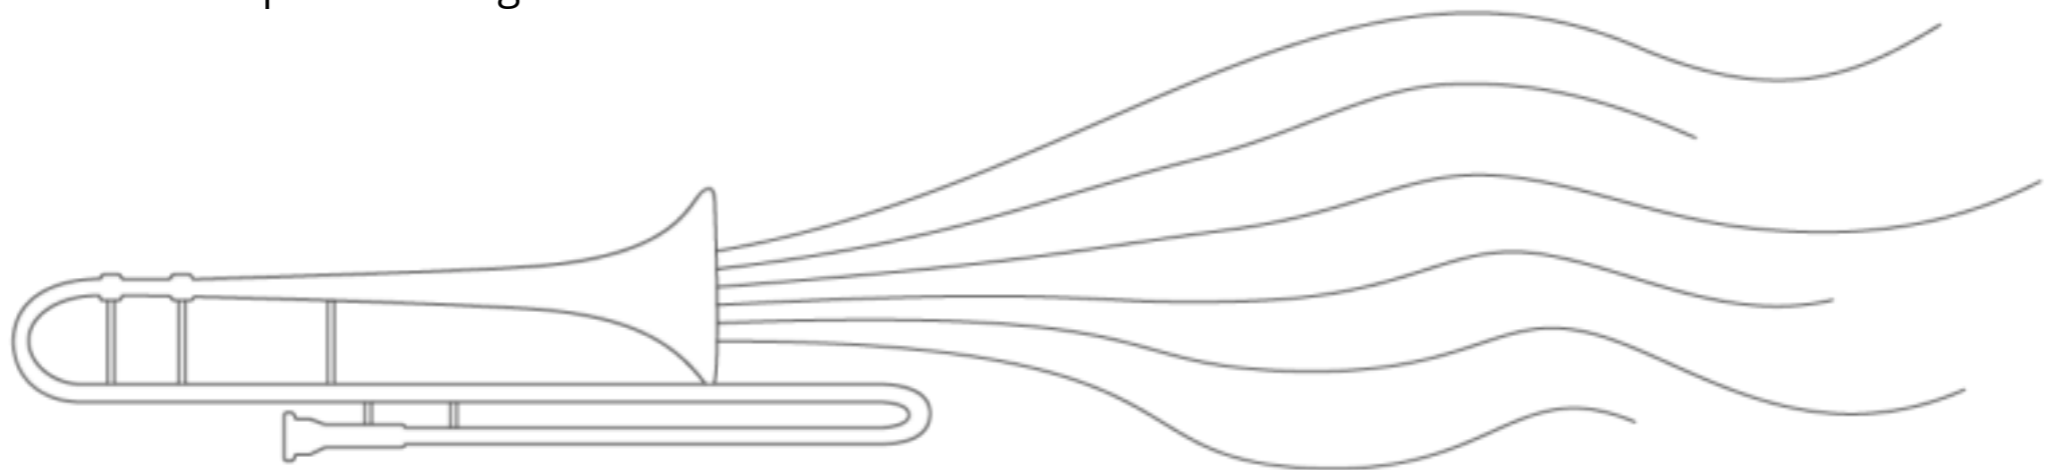

”BE A PART OF THE FUTURE OF AUDIO”

THIS IS THE JOB

Audiodo Personal Sound is taking off and we're on the lookout for new talent! We are currently looking to hire an in-house app developer to join our ambitious team.

The candidate is expected to take on a senior-level role and be in charge of everything app related. This includes maintaining and developing the app for Audiodo internally, but also helping with the re-skinning of the app for world-renowned headphone brands who want to include Audiodo Personal Sound in their product range.

- Developing new features in the apps (Android and iOS)
- Debugging, troubleshooting
- Re-skinning the apps to suit our customers' brand
- Reviewing code changes made by colleagues
- Interacting with designers regarding feasibility
- Maintaining and improving architecture
- Keeping track of iOS/Android platform to ensure the apps are up-to-date and possible for release

IS THIS YOU?

- Wants to be in charge of an app that is quickly becoming the new standard in audio consumer electronics
- Isn't an expert in everything, but is an easy-going person who loves to code
- Enjoys working closely with international headphone brands (North America, Europe, Asia)
- Is proactive in sourcing information they need from colleagues/customers
- Is comfortable using Git as a version-control system
- Has a passion for music

IDEAL KNOWLEDGE:

- Android
- iOS
- Kotlin
- Swift
- Objective C
- JavaC
- Git
- C

STRONG PLUS +

- Embedded software
- Audio algorithms
- Connectivity technologies such as Bluetooth

WHAT WE HAVE TO OFFER:

A chance to make a HUGE impact both within Audiodo but also for the consumer audio electronics industry as a whole

Freedom with responsibility—do your work as you see fit and produce the best results

Free choice of laptop, operating system, and two large screens

Non-pretentious, relaxed atmosphere in the office

Talented and down-to-earth colleagues

Competitive compensation

Great office space in Västra Hamnen, Malmö

A round of table tennis when it's time for a coding break :)

Flat hierarchies

BENEFITS:

Flexible working hours and work-from-home opportunities

30 days paid vacation

Fitness/Wellness reimbursement

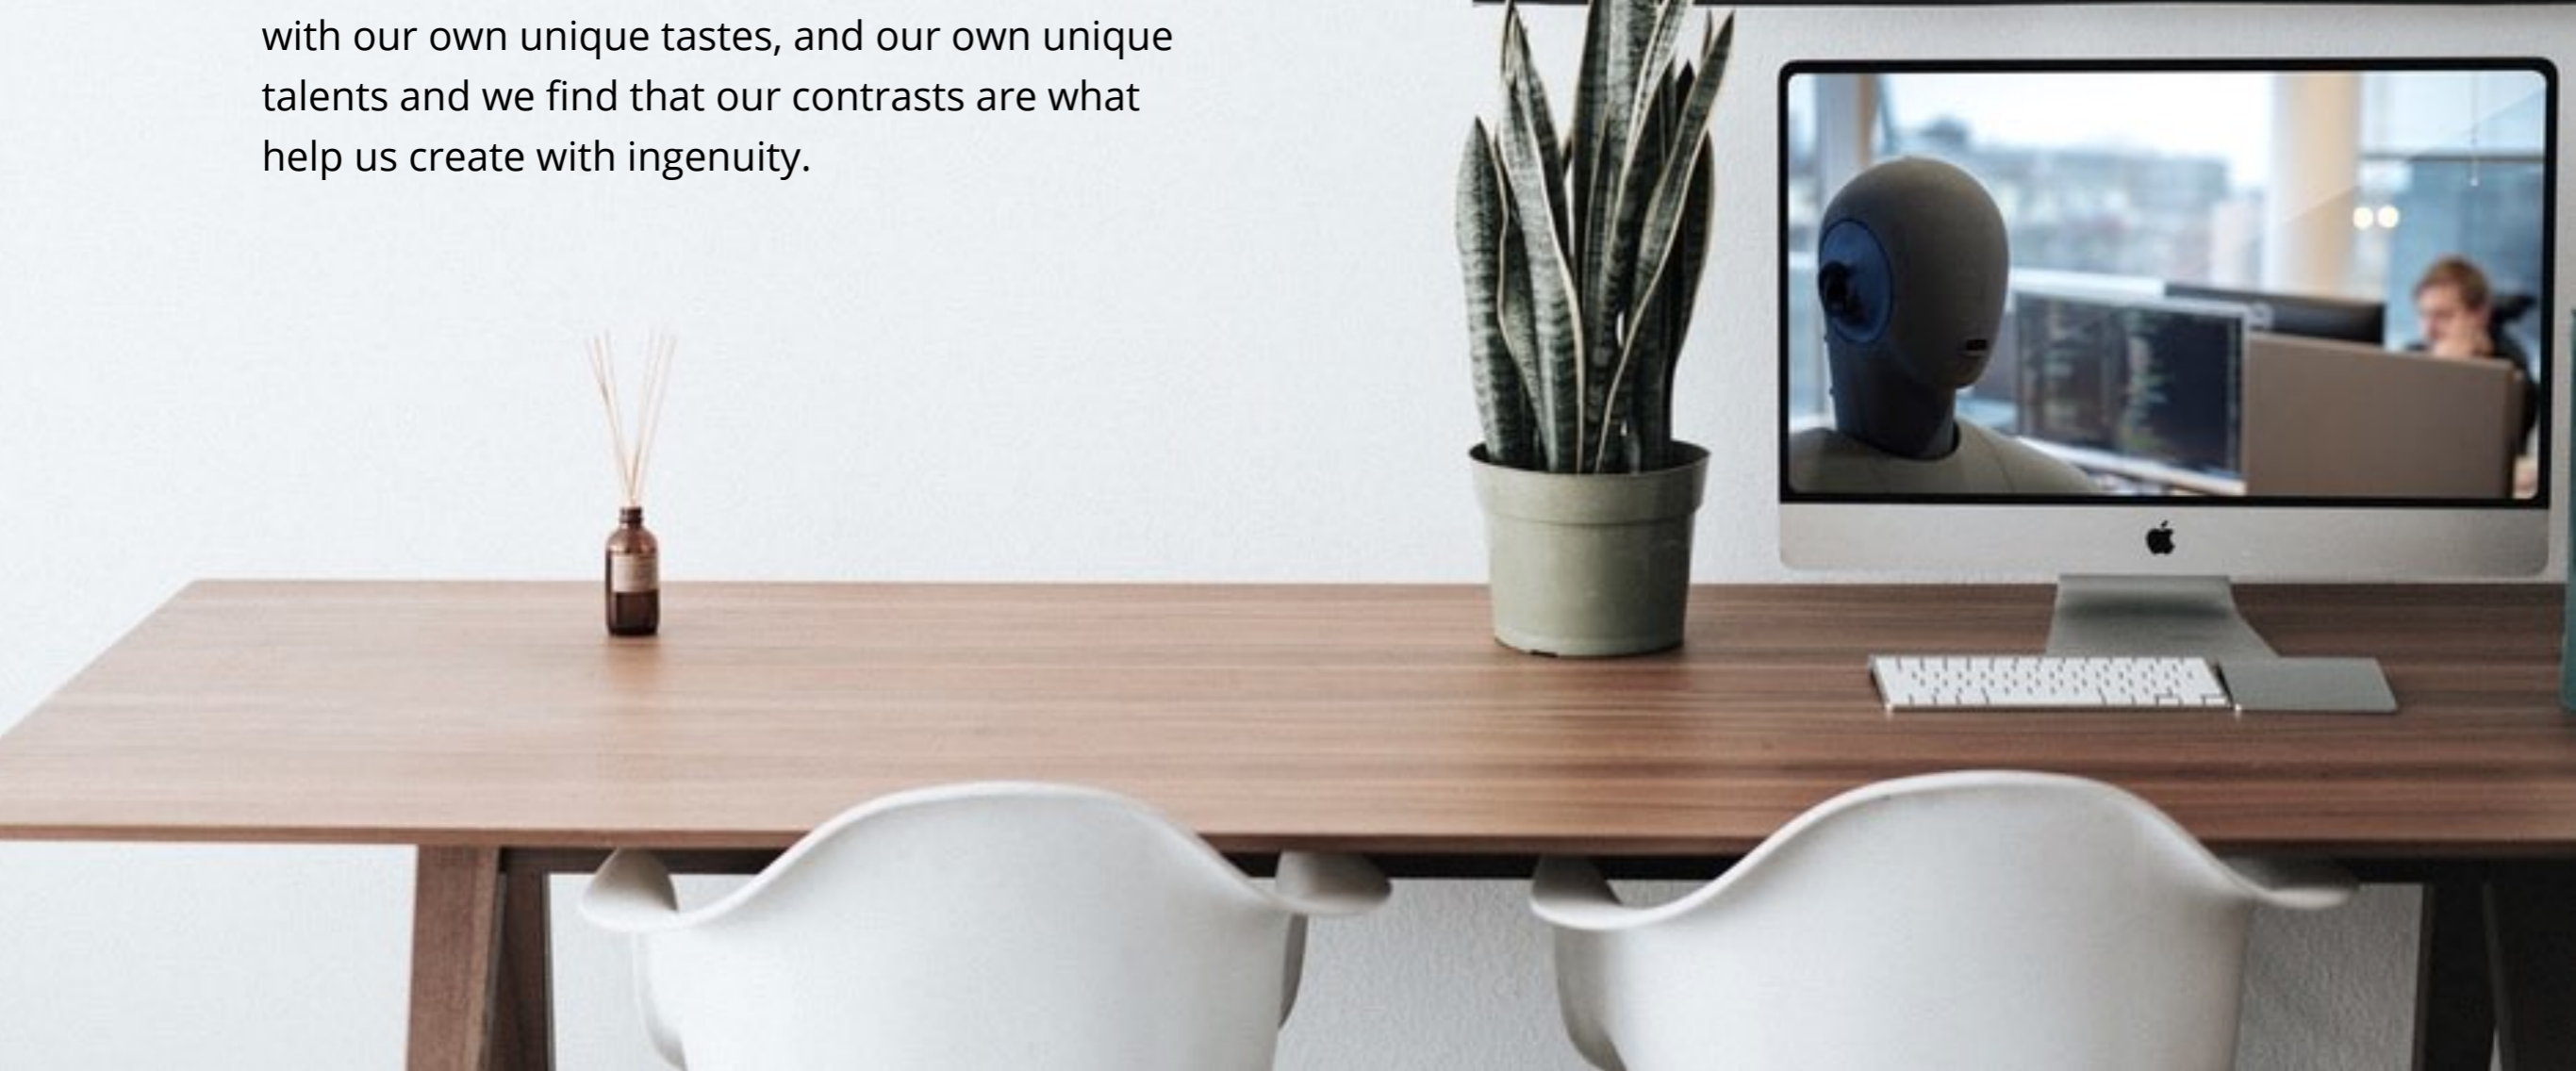

Fresh fruit and good coffee (lots of fika!)

Ocean view with your lunch

Happy and helpful colleagues

THIS IS US

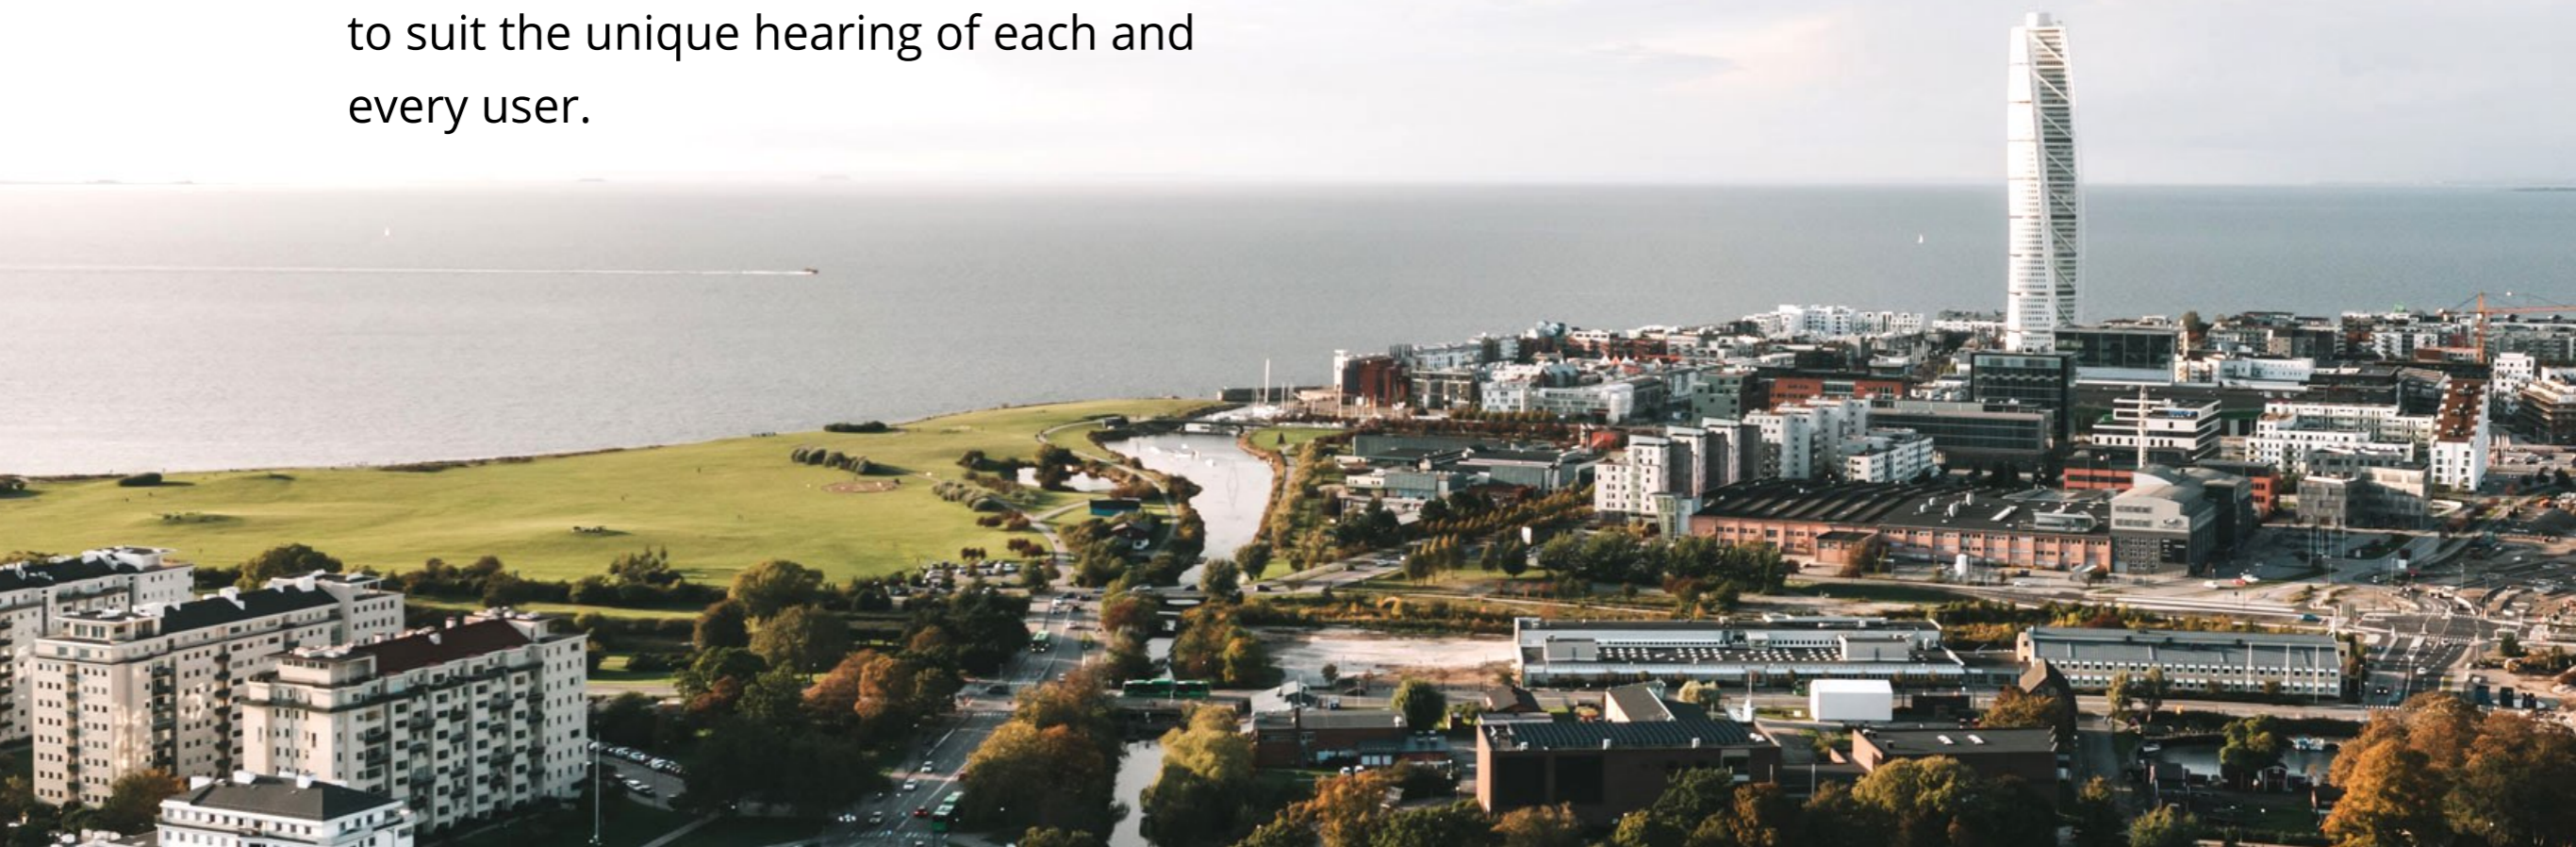

At Audiodo, we all have a passion for audio and are stark believers that music has the power to positively impact our everyday lives. Our team is made up of choir singers, analog synth programmers, and hip-hop producers. Not all of us can play an instrument, but all of us love the sound of music. We are all unique individuals with our own unique tastes, and our own unique talents and we find that our contrasts are what help us create with ingenuity.

THIS IS AUDIODO

Headquartered in Malmö, Sweden, Audiодо™ utilizes the science of sound to provide a never-heard-before audio experience with our proprietary technology Audiодо Personal Sound™. With over 30 years of experience in the audio and engineering fields, our determined audio experts and engineering wizards have developed a technology that is able to adapt audio to suit the unique hearing of each and every user.

The technology consists of an app that determines the hearing characteristics of the user (which we re-skin for our customers) and processing algorithms that adapt sound in real-time (built into the Bluetooth chip of our customers' headphones). What results is a listening experience with a depth, richness, and clarity you have never heard before.
