

We make IoT
simple
and accessible
for you.

Interested in distributing
one of our solutions or
do you have ideas about
your own IoT solution?

**WE ARE HAPPY
TO HELP!**

Take advantage of the
possibilities and don't miss out
on the strengthening of your
business. The possibilities are
endless, together we'll find the
best solutions!

The Internet of Things provides your business with
opportunities through monitoring and control of
data that lead to tremendous benefits:

- IoT reduces maintenance and management costs
- IoT gives insight in energy usage
- IoT can provide reduction of risks
- IoT makes workers more knowledgeable and more efficient in what they do
- IoT enables easier ways to compliancy.
- IoT gives you the lead

Not to mention the new forms of services you can
offer to your clientele. Make new connections and
create new business opportunities. Provide yourself
with the sheer easiness IoT can bring. Together we
can build a sustainable product/service that will
skyrocket your business into the future.

WITH IOT FROM IDEA TO CUSTOM SOLUTION FOR YOUR INDUSTRY

Translation from ideas to custom solutions for
your business is what we do best. We would like
to make this translation with you and for you. In
our process of looking for new business partners
we always look for experts within a certain
industry. We would like to discuss what IoT can
bring to your business and go from a bright idea
to a shining result.

As an expert in the world of IoT, we make our own
hardware and software. This makes us unique and
flexible in a fast moving world. Therefore we can
say: the possibilities are endless.

Try to challenge us!

WITH IOT FROM DATA TO USABLE INFORMATION

Perhaps the most important aspect of IoT is transforming data into information. Centralizing data is necessary, but in order to quickly benefit from IoT's capabilities, it is crucial that the information is offered in an understandable and usable way.

As an expert in your industry you know what types of information are important for end users. Avic can translate your knowledge into a simple, reliable and above all usable IoT application that offers exactly what these end user need.

AVISION IS A PLATFORM THAT GROWS WITH YOU

Our easy to use platform "Avision" is characterized by the sheer simplicity, there is no need to know something about coding, it is build to be as user friendly and easily adjustable as possible. This results in an extremely short development time and very low initial costs.

Perhaps even more important is the ability to continuously add functionality while using the application. Most of our partners constantly find new possibilities to implement in the platform and we are always eager to provide. As a group of people who love IoT, we like to get challenged. Therefore, Avic's IoT platform "Avision" can easily grow with you and your business without having expensive software costs.

Our 20 years of experience in IoT makes us a valuable asset in the digital world. Together we can realise new ideas and bring them to life.

Let us guide you through the wonderful world of IoT.
