## Course description

### General information

The OSINT-training II (Professional) is a follow up of the OSINT-training I (Beginner) and is part of the accredited SPEN-Registeropleiding **Certified Open Source Intelligence Specialist®**. This 3-day interactive training broadens and deepens earlier discussed Open Source Intelligence methods, tools and techniques.

After completing this training the student has a high-level knowledge of and experience with the use of Open Source Intelligence. The student is able to conduct safe and effective internet investigations and can successfully create structured case reports.

### Who should apply for the course

This OSINT-training course is helpful for **investigators, analysts** and **researchers** from both the public and private sector and for anyone who is engaged with the task of searching for information on the internet.

This OSINT-training course is suitable for law enforcement, intelligence personnel, private investigators, insurance investigators, researchers, recruiters, sources, customer due diligence analyst, lawyers, governments and (local) authorities.

We strongly recommend you to have completed the OSINT-training I (Beginner) before applying for this training.

### Course objective

After completing this course the professional will be able to conduct a secure, effective and high-quality open source intelligence investigation within current Dutch legal frameworks. The professional is able to create proper case reports and to present and explain its findings.

### Course level

This training course will be provided on the level of **higher professional education** (Hbo in Dutch). Advanced search methods and techniques will be discussed and practiced in this training.

Three day course:  
**OSINT-training II**  
(Professional)

Required prior knowledge

Because this training is a follow up of the OSINT-training I (Beginner), we strongly recommend you to have completed the OSINT-training I (Beginner) before applying for this course. However, this training can be joined as a single module. Prior to joining the OSINT-training II (Professional) as a single module, the student needs to complete an admission test.

In the case of joining the OSINT-training II (Professional) as a single module, the student is not eligible for the diploma of the Certified Open Source Intelligence Specialist®. Please contact us for more information.

Exemption policy

There is no exemption policy for this OSINT-training.

Study hours

The total duration of this OSINT-training course is 24 hours. This course consists of three days of seven study hours plus three additional hours of self-study prior to the course. The course will be completed by passing a digital exam.

## **Certification**

After successfully completing this training, the student will receive a certificate in the form of a diploma from the Stichting Permanente Educatie Nederland (SPEN). After completing this training, the student is may use the title Certified Open Source Intelligence Specialist®.

After successfully completing this training, the student will also receive Permanent Education (PE) points and will be registered and the Abituriëntenregister of the Centrum voor Post Initieel Onderwijs Nederland (CPION).

*\* Students are only eligible for the certification in the form of a diploma if they have successfully completed both the OSINT-training I (Beginner) and the OSINT-training II (Professional). In all other cases the student will receive a certificate of participation.*
