# VILLA PAZ

El Hortelano  
desde 1999

Finca Reserva  
Natural de la  
Sociedad Civil  
**VILLA PAZ**

We started our Project back in the year 1990, today we are a natural reserve which makes up part of Colombia's National protected hábitats. After meeting all necessary criteria, we became the first private property registered as a privately owned protected área, this occurred back in the year 2001. Given our passion for vegetables and in order to finance the establishment and future care of our natural reserve, we decided back in 1998 to develop an organic vegetable production. Together with other small farms we obtained the first organic certification awarded in Colombia in 2000.

---

We are located high in the Andes Mountains at an elevation of 2900 meters above sea level, we are 30 kilometers away from the capital Bogotá.

We have been continuously producing since 1999 a great variety of vegetables suited to our cold humid environment. We transport our product to our processing plant in Bogotá where we select, wash, sanitize and package our product. We specialize in the creation of different kinds of mezclum, washed and ready to eat. We sell to local restaurants, hotel chains and we deliver our vegetables to many many individuals and families in the city of Bogotá.

# PRODUCTION PROCESS

Given our personal beliefs, the realities of climate change and our vegan lifestyle, we are very interested in pursuing and establishing the **Biocyclic Vegan** agriculture practices.
