Easter egg decoration for the 10 x 10, 4" x 4" frame

Please read to the end.

For each egg we need:

Embroidery frame with fleece for stabilization and embroidery thread of your choice

2 pieces of fabric A 10 x 12 cm 4" x 5"

1 piece of fabric B 10 cm x 5 cm 4" x 2"

1 decorative ribbon approx. 10 cm 4"

and fiberfill

Embroidery thread and bobbin thread, as well as tape, scissors, needle and thread.

Clamp the fleece drum-tight in the frame

Sequence 1 embroiders the outline onto the backing

Place 1 piece of fabric A, right side up and fix with adhesive tape

Sequence 2 embroiders the fabric

Thread in sequence 3 desired thread and embroider the letter

Thread sequence 4 in contrasting thread and embroider the outline of the letter

Sequence 5 embroiders the line for the ribbon

Lay the decorative ribbon on the line, fix it on both sides with adhesive tape, embroider with sequence 6

Place piece of fabric B, right side down, on the ribbon so that the fabric is below the line but the fabric is a few millimeters above the embroidered line of the ribbon.

Embroider with sequence 7

Fold piece of fabric B up

and the second part A with the right (nice side) down and fix it.

Sequence 8 embroiders the fabric, leaving an opening for turning

Take the frame out of the machine. Remove the embroidery from the frame and cut out close to the edge. At the turning opening we leave the seam so that we can close it more easily.

Turn the egg over and fill it with fiberfill.

Then close the turning opening with your hand and a ladder stitch.

Alternatively, volume fleece can also be used. However, I recommend Avalon Film for the letters so that they do not sink.

If you want to embroider the eggs without a ribbon and without a second color, sequences 5-7 are omitted.

The files were embroidered as a test and ran without any problems. However, I make no guarantees.

As an addition, there is a blank file to decorate or write on yourself, as well as a sign Happy Easter, which is embroidered like a MugRug. You can find the instructions for a MugRug in my video.

The eggs can be placed in a basket, hung on branches, or tied to jute ribbon. There are no limits to the fantasy here.

I would be very happy about photos on my blog.

translation was done with Google

I wish you lots of fun embroidering

Uschi
