

PROPOSAL FROM BOMBAY BC

Bombay (BOM non) is a solid black cat. No other colour nor any pattern shall be recognised. Since black is the only permitted variety, they shall be registered as BOM non without any additional EMS code. BOM non can only be used for breeding BOM non.

Appearances of BOM non x BOM non offspring and how these must be registered:

Appearance	EMS code	Breeding and registration restrictions
black	BOM non	Can only be used for breeding BOM non
burmese pointed: brown	XSH n 31 [BOM non]	Can be used for breeding BOM non, cannot be re-registered
burmese pointed: any other colour	XSH * 31 <BOM non>	Cannot be used for breeding BOM non, cannot be re-registered
any other variety	XSH * <BOM non>	

** means additional information following the EMS system; i.e. lower case basic colour letter etc.*

Permitted outcross is Burmese brown (BUR n). Other BUR colors are permitted in the ancestry. American Shorthair (AMS non) is permitted in third and fourth generation until the breed has obtained full recognition

All outcross breeding and registration of kittens must follow § 9.1.

Appearances of BOM non x (BUR n/XSH n 31/ XSH n (BOM non) offspring and how these must be registered:

Appearance	EMS code	Breeding and registration restrictions
black	XSH n (BOM non)	Can be used for breeding BOM non, can be re-registered (→ § 9.1)
burmese pointed: brown	XSH n 31 [BOM non]	Can be used for breeding BOM non, cannot be re-registered
burmese pointed: any other colour	XSH * 31 <BOM non>	Cannot be used for breeding BOM non, cannot be re-registered
any other variety	XSH * <BOM non>	

** means additional information following the EMS system; i.e. lower case basic colour letter etc.*

Please note the meaning of the different types of brackets used in the EMS codes above:

Bracket type	Breeding and registration restrictions
(XXX)	Can be used for breeding, can be re-registered (→ § 9.1)
[XXX]	Can be used for breeding, cannot be re-registered
<XXX>	Cannot be used for breeding, cannot be re-registered

XXX means EMS code of the relevant breed

When breeding BOM non:

- BOM non and BURn used in breeding must have a DNA-test for GM2 gangliosidosis, unless both parents are proven to be free from GM2 gangliosidosis
- These breeding principles are to be followed:
 - GM2-free x GM2-free
 - GM2-free x GM2-carrier
- The cats that need testing according to this rule must be identifiable by microchip or tattoo
- Test results must be registered and published in accordance with § 3.5.1
- The breeder must inform buyers of Bombay cats about the GM2 gangliosidosis-disease and the registration policy
- It is recommended to test breeding cats for chocolate and dilute to avoid non-recognised colours in the offspring.
