What is VR?

When you talk about Virtual Reality, it means, loosely translated, "Apparent Reality" or "Virtual Reality".

This Virtual reality is shown to you in such a way that it feels like reality, hence this term.

Virtual Rooms

- Social meeting place
- Give presentations
- View and interact with 3D (objects)
- To collaborate on projects

What is AR?

With Augmented Reality or AR, a digital layer is superimposed on reality. You see the world around you, and on a screen. For example on a smartphone or tablet.

The term "augmented" stands for "added", new information is added to reality as we can perceive it.

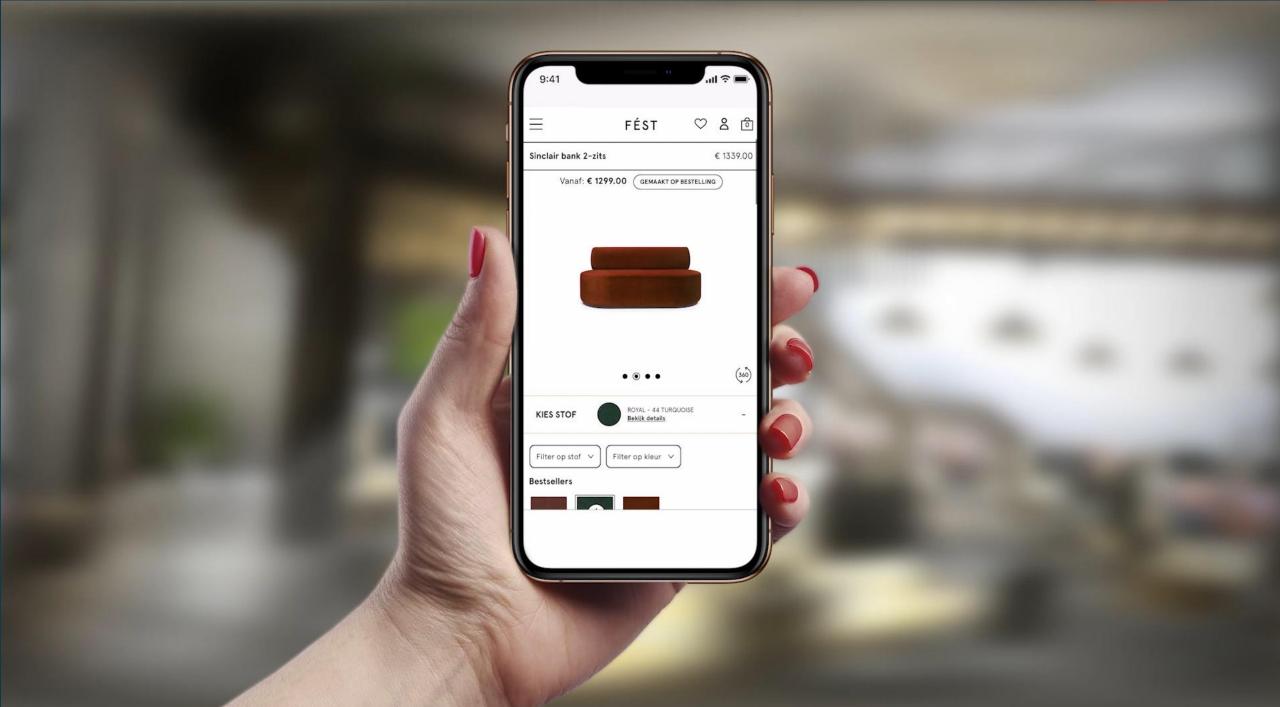

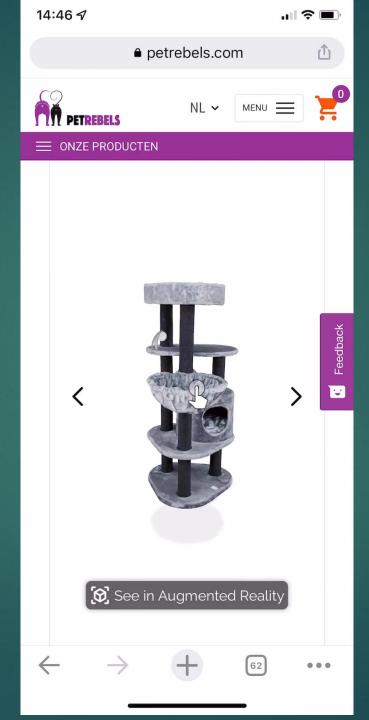

Augmented Reality

- 3D objecten
- Video tracking
