

**Strategy**

- A three-year strategy that capitalize on the yield spread between Scandinavian covered bonds and government bonds.
- The strategy is straightforward: Purchase AAA-rated covered bonds while simultaneously selling swaps/government bonds.
- The yield spread is enhanced through leverage thereby achieving a higher expected return on investment.
- The strategy benefits from a declining risk profile as the underlying bonds approach maturity.
- After the three-year term, the fund is liquidated, and investors receive their capital incl. return on investment.

**Actual Portfolio**

SEK vs. swap	56%
