

The CORI-Mini-Controller is a door controller that manages authorizations without a PC connection and controls the opening of the door, gate, bollard or barrier during the badge process. The controller is configured with a remote control and can be connected to various readers. This allows different types of access. Some examples of the reading methods are: RFID transponders with / without PIN code, UHF wide area badges, QR code or ANPR camera for vehicle recognition. The authorizations are loaded and deleted using a handheld transmitter or programming cards.

Supply voltage power consumption	12 V DC voltage < 20 mA
Number of permissions	to 1000
Wiegand interface input exit	Wiegand 26-37 bit Wiegand 26-37 bit (data transfer)
Environment Operating temperature range humidity	-40 ° C to 60 ° C 0 - 90%
material color mass weight	ABS plastic black 65 mm x 54 mm x 19 mm 40 g
