

Care Connex

SPECIALIST IN HEALTHCARE

**PROVIDING EXCEPTIONAL
HOME CARE**

ABOUT US

When the time comes for someone to need care in their home, we recognise that the prospect might be intimidating for them. Care Connex will assist in addressing any fears, queries, or issues that you may have and will answer any inquiries that you may have. We constantly take into account the specific requirements of a person and schedule our visits around their schedule.

This might range from a brief morning visit once a week to care that is provided around the clock, seven days a week. In either case, we offer adaptable home care services to meet the specific requirements of each individual client.

We at Care Connex are extremely proud of our hard-working home care team, which provides assistance to a diverse group of people. Adults and seniors, as well as individuals with physical impairments and learning difficulties, can take advantage of the in-home care services that we offer. Carers of loved ones who are in need of a break can also take advantage of our respite care services.

OUR SERVICES

LIVE IN CARE

Many elderly people understandably want to stay at home for as long as they can, keeping the comfort, relationships, and memories that come with living under their own roof. Moving to an assisted living home is a life-changing and often traumatic move, so it is understandable that it is frequently postponed until there are no other alternatives left.

Live-in care is a strong alternative to assisted living because it allows individuals to preserve their independence and quality of life while being securely supported by highly trained and experienced carers.

Live-in care is not only helpful physically and practically, but the companionship also makes the person feel better mentally, which helps them stay healthy for longer.

DOMICILIARY CARE

Our domiciliary care lets your loved one stay in the comfort of their own home while getting social, emotional, and physical help from a professional caregiver.

Also, if you use our home care service, the amount of care you get can be slowly increased or decreased to meet your changing needs.

The service we provide is dependable, adaptable, and highly personal, putting your needs first. We treat you or your loved one like family and try to become an important part of their network of support.

RESPITE CARE

Respite care is often a short-term package of care provided by someone who is not your loved one's primary caregiver. Respite care from Care Connex would be given in their home. This would give you, as their main caregiver, time to relax and take care of yourself so you can take better care of them.

We recognise that in order to offer the greatest care for your loved one, you must also take care of yourself. It is critical to take time to relax and rejuvenate, as well as to have someone you can trust look for your loved one. Our carers are reliable, kind, and well-trained, so you can feel safe taking that much-needed break.

COMPANIONSHIP CARE

Our friendly and polite carers will spend time with you or your loved one as part of our companionship service. During this time, they may assist with activities such as doing the crossword puzzle, participating in activities related to hobbies and interests, organising the garden, going to social events, or simply having a good conversation over a cup of tea.

These ordinary activities may sometimes take on a far greater significance when there is no one else nearby to share them with, and they have the potential to prevent you or a loved one from getting isolated or lonely.

DEMENTIA AND ALZHEIMER CARE

Caring for an older loved one who has Alzheimer's or another kind of dementia may be extremely challenging for your physical and emotional well-being. Because of the disease's degenerative nature, many families seek the support and help of home care specialists such as Care Connex. Care Connex are experts in Alzheimer's and dementia care and can make your loved one's and your life simpler and more pleasurable.

We will collaborate with you to develop a personal home care plan that will evolve as your loved one's needs change. Our care team has significant training and expertise in delivering the appropriate degree of personalised care and assistance, as well as closely monitoring everything from medication to everyday activities.

COMPLEX CARE

Our complex care service is a less expensive option to nursing, fully managed services, or residential care homes. We can supply individuals with profiles of highly skilled carers who can assist with a wide range of complex care requirements, allowing you or your loved one to live comfortably in their own home.

Our self-employed carers and personal assistants will enable you to provide ongoing complex care on a one-to-one basis, reducing stress and disturbance for those with severe diseases.

***Keep your familiar friends,
family, and things close by
with our home care.***

OUR PROCESS

1

Contact us
Call us on **0775 250 4556**
0115 824 1199
