WELCOME TO CHARISMATIC CARE

COMMITTED TO COMMUNICATION, INTEGRITY, AND PERFORMANCE

SERVICES WE PROVIDE

LIVE-IN CARE

Unlike so many others, we guarantee client satisfaction because we deeply care for our clients. When choosing the right home care agency, it is important to ensure the company you select maintain a set of core values. At charismatic, we are committed to communication, integrity, and performance. We believe that you should never feel there is a lack of control or communication with your personal attendant. We consider it our personal mission to provide the most caring and supportive service possible.

PERSONAL CARE

Personal care is a term used to provide help and support with daily tasks such as washing, dressing and bathing. Fitting within your or your loved one's regular routines we provide at home support with daily personal care tasks such as showering, dressing, applying creams and make-up, and shaving.

Our well-trained carers can visit at home, with a schedule that's been agreed in advanced.

SHOPPING & MEAL PREPARATION

A healthy, delicious and nutritious meal is so important for both mental and physical well-being, as is being in control over your food choices and being able to feed yourself if possible. Being able to shop for food is also an important part of staying well and independent, especially as we age. Our shopping and meal preparation service ensures that the people we care for enjoy the process of planning, buying and cooking regular, healthy meals.

MEDICATION ASSISTANCE

We help organise, plan and collect your medication knowing how important it is to keep to your medication. We place importance on:

- What its for
- When it should be taken
- The dosage
- Any instructions from your pharmacy or doctor

ABOUT US

Our caregivers are meticulously screened, background-checked, and certified, providing you with peace of mind in knowing that you can trust in every member of our team. Furthermore, our aides work with licensed nurses to develop a precise healthcare plan for your loved one, making sure each need is met in a manner that promotes well-being and balance.
