Studio Associato Caccia Dominioni e Zucca was born in Milan in 1970 from the passion of two young Professionals who rapidly imposed themselves in Italy and soon realizing interventions also in the rest of Europe (France, Switzerland, Belgium).

For more than 40 years of experience the Company has been establishing itself in all the sectors of Architectural Design as industrial design, urban design, advertising graphic and coordinated image.

The Company starts its activity focusing on private and industrial construction; later on it turns to the tertiary branch to finally focus, during the last years, on construction renovation and restoration. Very recent is the intervention on Malpensa Airport.

Many private clients choose the Company for the realization and the restoration of their residences. The list of clients also counts banks, insurance companies, fashion show rooms and industries of different kinds of products.

The success gained and consolidated through the years is founded on the ability of the Company to interpret the different styles, understanding at its best the client's requirements and desires, creating rational structures and efficient and comfortable spaces.

The realization of the projects is supervised in its finest detail: the Company works in close quarters with all the professionals of the branch and it coordinates the contribution in order to maintain at its highest the quality of work.

In 2013 the Company was renovated and the structure was extended, still remaining in the scar of tradition and maintaining a strong culture and ability of purchasing along the path.

The Company, which has always committed to product design such as lamps, furniture, accessories, etc., decided to include professionals who, through the years, had reached close contact with.

The Studio Architetti Caccia Dominioni – Zucca e Associati was born this way.
