

# AX 400

designed by U-Control

## Designed for Operator Comfort & OEM Flexibility

The AX400 armrest is the solution designed to combine aesthetics, ergonomics and customization in the configuration of the control interface plate.

Added value of AX400 is the adjustability in anchoring to the seat. Its shape is designed to guarantee maximum space for the controls.

The 400 $cm^2$ interface area is fully customizable – for both control components and visual design – without compromising the compact form factor.

## Product Highlights

**Design your control layout**

Decide exactly which functions and components to place on the generous 400 $cm^2$ command interface plate – joysticks, keypads, touchscreens or selectors.

Optimize the layout for your operator

Position every control element exactly where you want it – maximize ergonomics, safety and productivity.

**Customize look & identity**

Choose surface colors, logos, and custom design details for both the control plate and the armrest body to match your machine and brand.

**Lightweight and ergonomic**

Engineered for operator comfort in demanding environments – with reduced weight and optimized arm support geometry.
