- Busy families
- Tech enthusiasts
- Energy savers

All supported by 24/7 remote diagnostics technology

Lyric™

Life in tune.

Introducing Lyric

Smart, sleek and simple

Your life doesn't operate on a fixed schedule. Why should your thermostat? The Lyric thermostat makes it simple. No schedules, no programming, and no complex menus. Just comfort that's perfectly in tune with how you live.

Comfort when you're home, savings when you're away

Lyric adjusts to life as it happens, using your smartphone location to make it comfortable when you're home and save energy when you're away.

Temperature that always feels just right

The Fine Tune feature considers both indoor and outdoor temperature and humidity to reach set point, ensuring 72° really feels like 72°.

Smartphone alerts keep you in the know

The Smart Cues feature will send you maintenance reminders and extreme conditions alerts to help extend the life of your heating and cooling system.

Ask your contractor about 24/7 remote diagnostics

Your service tech can alert you to potential problems before they happen, giving you peace of mind and saving you valuable time and money. Call today!

Control on the go with
the Lyric mobile app.
