Crazy Creek Products is a Montana, USA based brand where we've been Perfecting "Just Sit There" since 1987.

Sit Sustainably

If sustainability is the "capacity to endure," Crazy Creek Chairs are the standard by which all others should be measured. Not only because our Chairs are built to last for years of hard use, but also because our strikingly simple design accommodates a wide range of uses, from the backcountry to the backyard. In contrast to some knock-off brands, you won't find a Crazy Creek Chair thrown away in a landfill after only a season or two of use. In fact, our customers often tell us that their chairs have been going strong for 30 Years...and counting!

A note about our Packaging: Crazy Creek is committed to eco-friendly packaging that is biodegradable and uses the least amount of packaging material possible.
