HOT-COVID newsletter – November 2020

Status

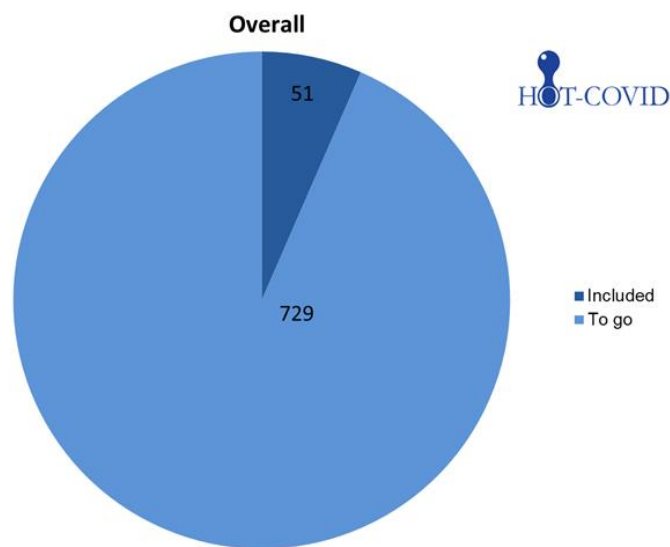

Dear friends and colleagues

We are happy to present this first newsletter for the HOT-COVID trial.

The HOT-COVID trial, which is an amendment to the HOT-ICU trial, but only including COVID-19 positive for SARS-CoV-2 was launched shortly after completed recruitment in the HOT-ICU trial. All trial related procedures and interventions are the same in the HOT-COVID as in the HOT-ICU trial, and thus will all trial relevant documents be available on both the HOT-ICU and the HOT-COVID [website](#).

Recruitment

On August 25th the first patient was enrolled in the HOT-COVID trial at Herlev Hospital. By now 51 patients have been recruited! We have initiated the trial in 8 Danish sites, in Basel (Switzerland) and Oslo (Norway), and hope to start soon in Iceland and the UK.

Consent forms:

We have implemented the possibility to upload all consent documents to the eCRF using the *consent form*. All sites are welcome to use this feature, but please note that it is only **mandatory for Danish sites**.

Things to highlight:

1. Please strive to screen all patients fulfilling the inclusion criteria as soon as possible after ICU admission
2. Please ensure that the specific e-mail notifications of major protocol violations are handled to secure adherence to protocol for all patients
3. Please use the "Consent form" in the eCRF to upload all relevant consents
4. The following documents have been updated:
[HOT-COVID protocol 1.2](#)
[Approval form the Ethics Committee](#) of the HOT-COVID protocol 1.2 (in Danish)
[Approval from the Danish Medicines Agency](#) of the HOT-ICU protocol 2.2 (in Danish)
[HOTCOVID co-enrolment form version 1.2](#) with approval for co-enrolment in the COVIPOC, COVID STEROID 2, and GODIF trials
