### HOT-COVID newsletter – February 2022

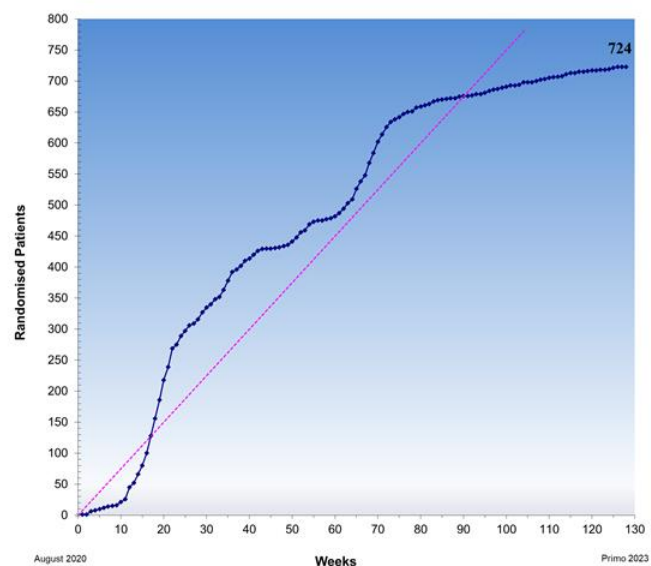

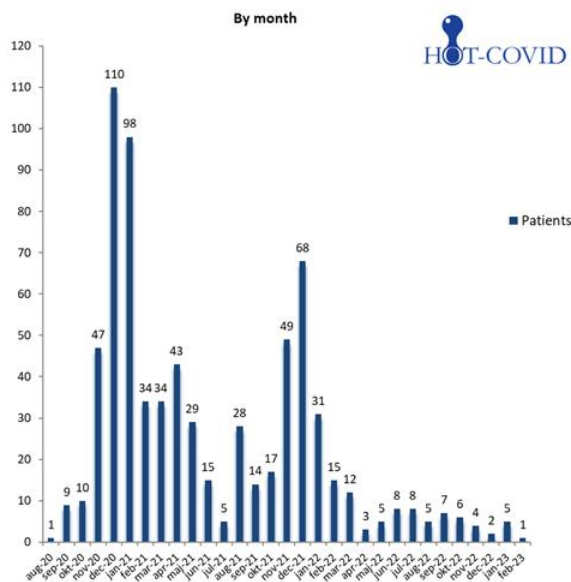

Dear friends and colleagues

#### Status

Randomisations have remained low throughout the winter reflecting the current course of the pandemic. It is important to note that the HOT-COVID trial remains on-going, and we urge all sites to screen all relevant patients. At this point every randomisation counts. In continuation hereof, we would like to express our gratitude for your continued efforts.

#### Recruitment

Currently, **724** patients have been randomised with only 56 patients to go before trial completion.
