

DEFINITION OF COOKIES

A cookie is a small text file that the website requests to store on the visitor's computer and which contains a certain amount of information and a certain time stamp.

The browser saves the information in a special place in your computer and returns the information in the cookie to the website you visited at each request of pages / images from the website.

TWO TYPES OF COOKIES

Cookies on this site are used to enhance the user experience and optimize the site. There are two types of cookies:

One type, called a permanent cookie, saves a file that remains on the visitor's computer. It is used, for example, to be able to adapt a website according to the visitors' wishes, choices and interests as well as for statistical follow-up.

The second type is called session cookie. While a visitor is on a web page, it is temporarily stored in the visitor's computer's memory. Session cookies disappear when you close your browser.

Our website uses both session cookies and permanent cookies. No matter what type of cookie is used on this site, no personal information about the visitor (such as e-mail address or name) is saved.

HANDLING OF COOKIES

If you do not accept the use of cookies, you can turn off cookies via your browser's security settings. You can also set the browser so you get a warning each time the site tries to put a cookie on your computer. Through the browser, previously stored cookies can also be deleted.
