

Danish Comfort
INTERIOR DESIGN

Danish Comfort is founded and owned by Anja Pedersen. A co-operation with Danish Comfort is based on creating a relationship of trust with our customer in focus. The foundation of our company is quality and credibility.

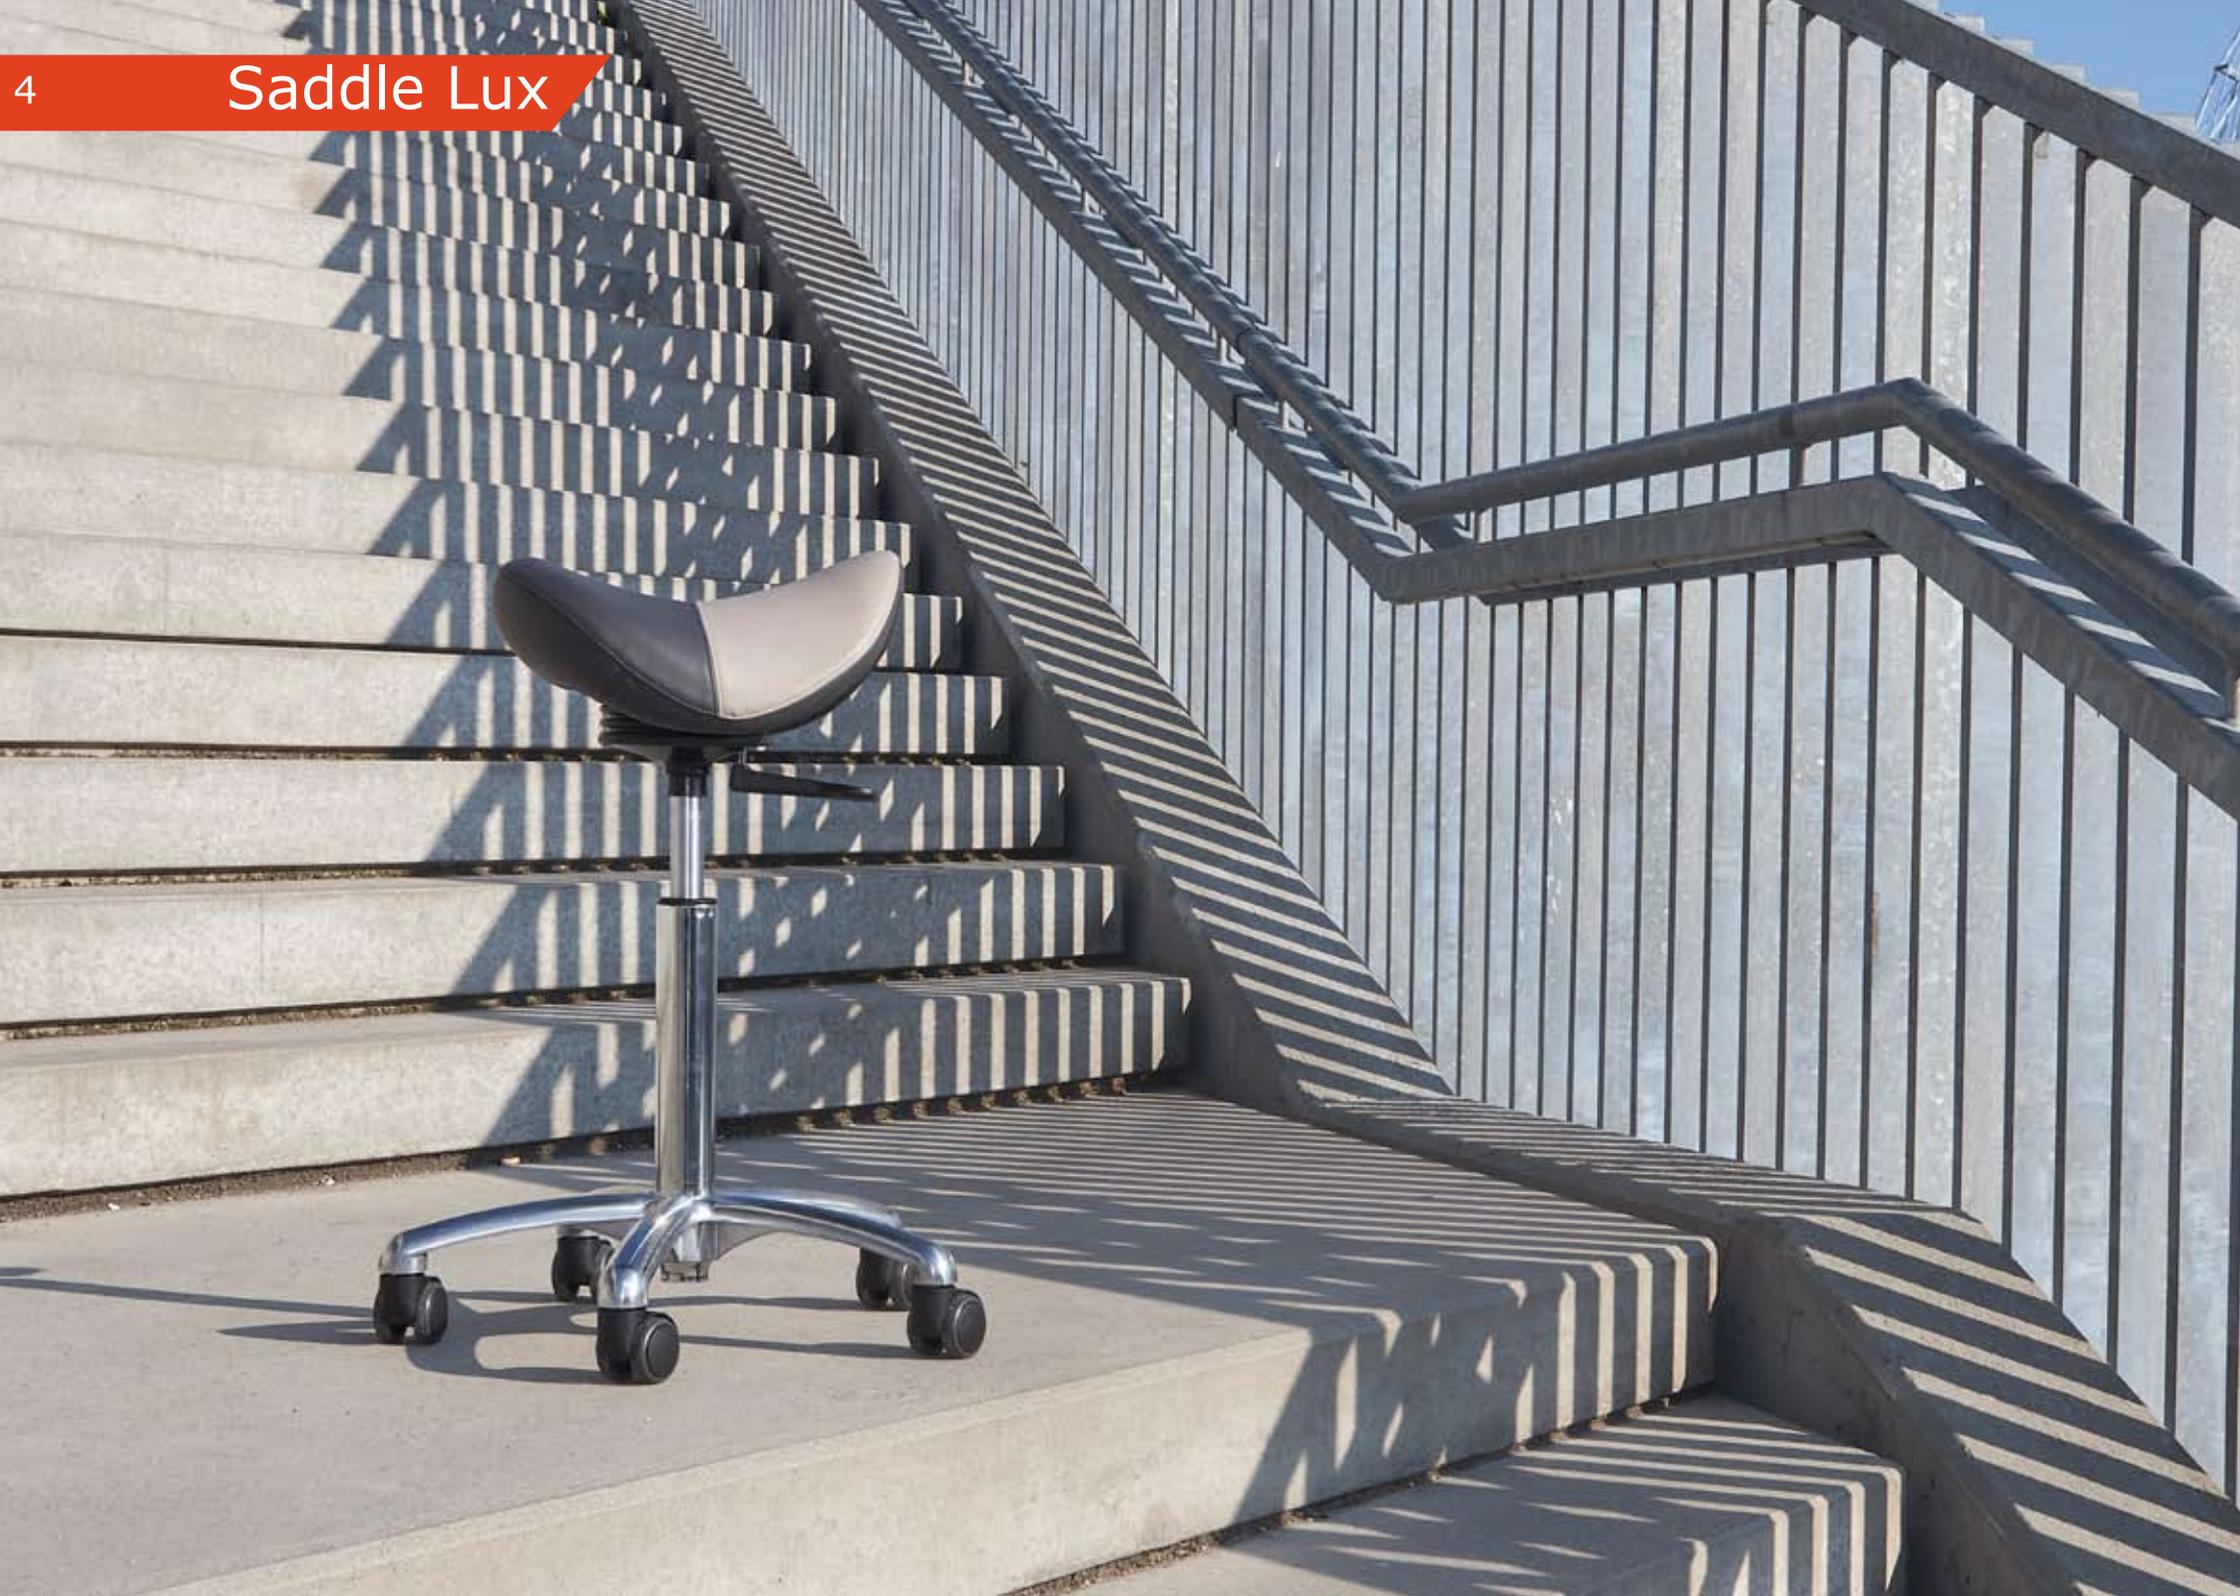

It gives me great pleasure and satisfaction to help my customers find the best solution and create joint results. A positive contact with our customers creates confidence and opens for a close dialogue and a co-operation where we together can develop options and solve specific assignments.

With creative and competent persons, we develop our own designs with our own crafts people and producers from Denmark. With our customers we can realize special assignments, e.g. establish and arrange rooms, offices, schools and hotels or we can help design new products.

We deliver B2B solutions for our customers.

Danish Comfort also imports products, furniture and applied arts that live up to our high standards of quality, functionality, design and price.

The Danish designed nests are eye catching furniture adding character to all sorts of spaces – both outdoors and indoors. The nests can be used in children’s areas as swinging hide-aways, for wellness and pool areas, in the living room, the garden etc.

The nests are made of volcanic basalt extracted from lava and coated with a soft touch polyurethane, Line X. The unique materials are both super lightweight and extremely strong, heat and sound absorbing, UV-resistant and resistant to sand, chlorine and salt. Therefore, they are suitable for year round outdoor use.

The nests are approved for 350 kg.

Danish-Comfort is presenting Sander as our new brand. It is a brand that we are proud of and which should present the nordic style.

With this brand we have focused on design and functionality. This makes our products suitable for both the private home and for commercial use. We have great experience with our furniture in restaurants, hotels and more.

Elegant Danish design, can be used in many different situations. The material has been thoroughly tested, it is non-toxic and produced in a 100 percent environmentally friendly process.

The product can withstand up to +120 degrees and down to -40 degrees, which makes it suitable for dishwasher and standing outside during winter time.

Danish crafts and design
