

Happy eArtheyears everybody!

Let's heal mother earth together through the Arts for our future generations to inherit a peaceful past. How can we use ecosocial cartography to solve as many SDG's as possible through multidisciplinary participation?

On the one hand I invite you to include your markers onto the current map versions of docutopia, following the little stART prototypes 1.0 & 2.0. where ECOHEROS unite....via:

<https://www.docutopia.de/>

The two prototypes of the open source platform "docutopia" offer the opportunity for software developers and many others with a long-term perspective to cocreate the next versions together. It's vision is to invite people to go on from the metaverse into the multiverse back on the ground of mother earth, to it's springs, rivers, forrest, seas and so on, to take care of it, map it and share knowledges about it and organize together for everyone's benefit. A substancial ingriedient will be the consensus tool #wikelecta to have a transparent way of law/policy co-creation, a people proofed polls and petitions integration to start/process local, regional and (supra)national decisions within public hands from being born onwards. Ecological, solidarity, political, multicultural, professional, private as well as already existing maps will be integrated as layers, where offers and needs can directly match on the map in the nearby future.

On the other hand, eco-social game components, so-called "ecoquests" shall be implemented. These plant seeds which will function in the future as a fertile ground of an unconditional basic income. Based on and supported by active prosumers in reality, the completion of the SDG's regarding preservation of biodiversity, water, air and earth quality as well as the health of the places and their people is given back as responsibility into their own hands.

Multidisciplinary research, scientific and artistic co-creation in any forms are also about to be included in the journey of the project.

If you would like to invest, water the plants of this ecosocial sculpture and help to grow strong and healthy into a peaceful coexistence with nature, I would be very grateful for this stArt up to work towards symbiotic synergy solutions with you and your networks.

I wish you all the best for your ongoing projects and keep your dreaming going

Sincerely yours

Bôba Mènde
