

DOCUTOPIA - SHORT SYNOPSIS

what? when..? where? who..?

DOCUTOPIA is an open, barrier-free and organic network with an editable map that can be expanded and accessed independently. The map helps to enter places, events, projects, communities, educational, artistic, professional and private co creations and supports everybody to discover new ones. Further docutopia gives alternative lawmaking and currencies, regional, crypto, timesharing and gift economy a new contemporary possibility to collaborate regiobally and transparent.

All cultures, ways of life, age groups, collectives and individuals are invited to participate in the communal process of creating a healthy future. Together we continue the path from utopia to living commons, sharing and caring as one real symbiotic synergy solution family on earth.

docutopia.de is a MetaMappingMultitool and permanently for free. Professions, passions, skills, needs, offers, gifts, projects, topics, communities, bioreservarts, humanreservarts, maps, apps, festivals, people, parties, institutions, NGO's, Carer, Freelancers etc. are part of the movement. Anyways DOcUTOPIA is not only a network of independent artists, friends, amateurs & professionals, peaceful folks, dancers, musicians, hand crafts women and men, healers, teachers, storytellers, permaculturists...it has the potential to make regiobal law itself. Transparent self-made PublicMedia and Justice. One to one jobs and trades direct with peer to peer market through honest human block chain comment, rating and voting functions. A utopian universe of variable labels and integrateable maps.

It' s not a trademark, copyright, symbol, patente or another chat - platform. It is a bridge back into reality, so to say a resocialising network. First of all a FREE TOOL.
