

IT'S **BETTER** TO BE IN THE PROCESS...
...THAN OUT OF **CONTROL!**

LUND Engineers & Contractors A/S possesses solid experience within the process industry; the chemical, oil & gas, food, metal, biotechnological and the pharmaceutical industry.

We are your independent partner and your interest and requirements are our main priority. As Main Contractor, we keep focus on the entire process and the coherence with the existing production. We take pride in a fast, effective and durable project process with a minimum of downtime. This is to ensure our customers the best quality with respect to economy, safety and environment.

The company comprises of qualified and motivated personnel handling any assignment ranging from larger in-house tasks to minor consultancy jobs. We consider whole of Denmark as our workplace with offices in Horsens, Kalundborg and Glostrup.

Our personnel possesses wide competencies, which give us a solid foundation as Main Contractor. We have specialists within electrical and instrumentation, steel and piping, ATEX specialists (CompEx certified), Supervisors and HSE consultants. Together we ensure that everything goes according to plan.

We work closely with our affiliated company Global Functional Safety that has specialists within machine- and process safety. The collaboration ensure that our work always comply with applicable law and standards to avoid compromising the safety of people, environment or equipment.

LUND
Engineers & Contractors A/S

We handle all assignments - no job is too big or too small
- do not hesitate to have LUND Engineers & Contractors A/S
as your Main Contractor at the next project.

LUND Engineers & Contractors A/S handle assignments both as Main Contractor and as Sub-Contractor. We have a wide range of competencies, and our skilled personnel has extensive experience and knowledge of all the processes.
