TRANSCREATION

With a firm grasp of the target country's language and culture, our experienced linguists offer transcreation services, guaranteeing the successful launch of your international campaigns.

Services on a "glocal" level

A brief is used as a guide for the transcreation of the material that our client will send out to other markets. In order to ensure that this material has the desired impact on the target audience, we engage linguists with excellent language and creative writing skills, excellent specialist subject knowledge and, of course, a firm grasp of the target country culture.

Retaining the original message

Our transcreators take into account the culture, values, idioms, dialects and sense of humour of the target language market, and appreciate the fact that any lack of regard for these may have a negative impact on the intended audience.

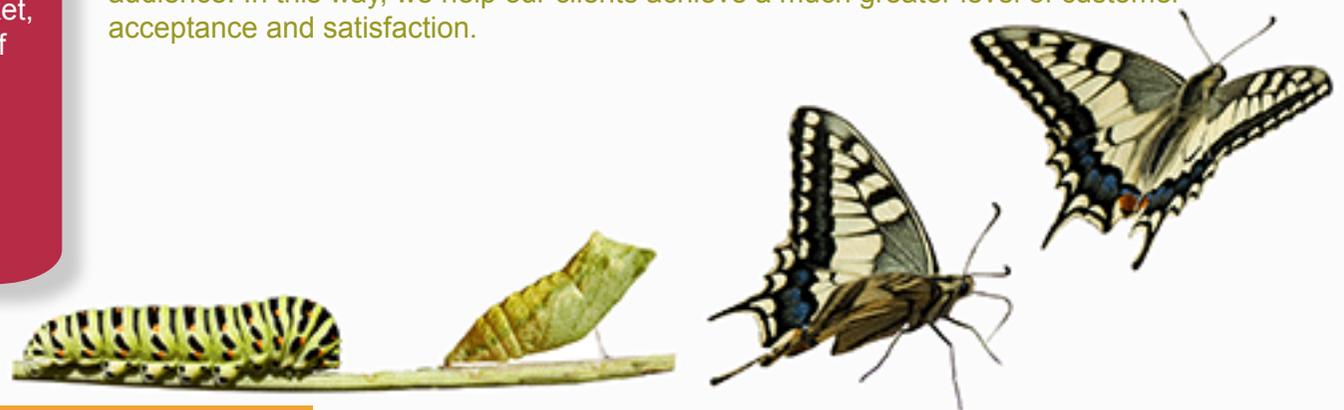

Engaging & creative transcreation professionals

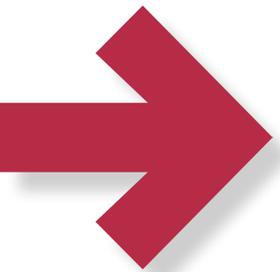

By offering transcreation services, Absolute Translations has embarked on a growing new industry. More and more of our clients launch international campaigns and we are here to help convey the intended message in a way that resonates with the target country audience.

In order to achieve these results, our in-house team of project managers work closely with our clients to carefully determine their needs and preferences in tone and style. Thus, we create a comprehensive and accurate brief that will be easily understood and followed by our professional and highly-experienced copywriters around the world.

Invoking the same emotional response

Our transcreation services differ from our translation services in that each message is creatively adapted in order to carry the same implications in the target language as in the source language, thereby evoking the same emotional response among the target audience. In this way, we help our clients achieve a much greater level of customer acceptance and satisfaction.

INTERPRETING

We are proud to be working with some of the finest accredited and experienced interpreters, both in the UK and abroad, providing you with a first class service.

Our project management team drives the whole process, taking care of everything from the interpreters to the technical equipment required.

MULTILINGUAL DTP DESIGN

Our DTP studio team works with the latest design packages including InDesign, Adobe, Quark Xpress, Photoshop and Illustrator. Experienced in working on standard and bidirectional multilingual language projects, our experts ensure your project is completed rapidly, matching the original at a fixed cost.

OUR EXPERIENCE INCLUDES:

A recent project involved a 100+ page guidebook for London's National Gallery. The book was translated into ten languages by our specialist translators and then typeset. Our typesetters' skills and experience enabled us to redesign the guide to accommodate factors such as language word count increase and the text flow direction for languages such as Arabic.

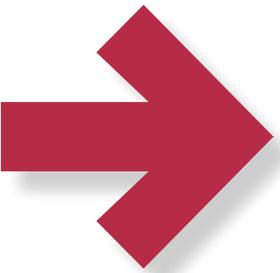

Other experience includes the DTP design for famous brands of books such as:

- The growing brand of the Dummies book series;
- Multilingual design of Timberland labels and materials;
- Technical manuals for the automotive industry, including projects for the largest global diesel engine manufacturer.

Thousands of hours of extensive experience in the preparation of manuals and user guides, promotional and publicity literature, and brochures and books will guarantee you the most efficient and cost-effective quality service.
