eu|academy

The European Union's corporate tool for e-learning.

The mission of the EU Academy is to provide a modern and engaging online learning environment containing courses, online training events, podcasts, live and recorded video talks, and related pedagogical resources that can contribute to improving the quality of the application of EU policy and programme knowledge in a simple, smart and inspirational way. Since 2020, the learning content hosted on the EU Academy has been created specifically for professional and aspiring professional audiences external to the EU Institutions.

The EU Academy is managed by the Joint Research Centre of the European Commission. However, as an inter-institutional platform, it hosts content produced by numerous EU Institutions and Agencies.
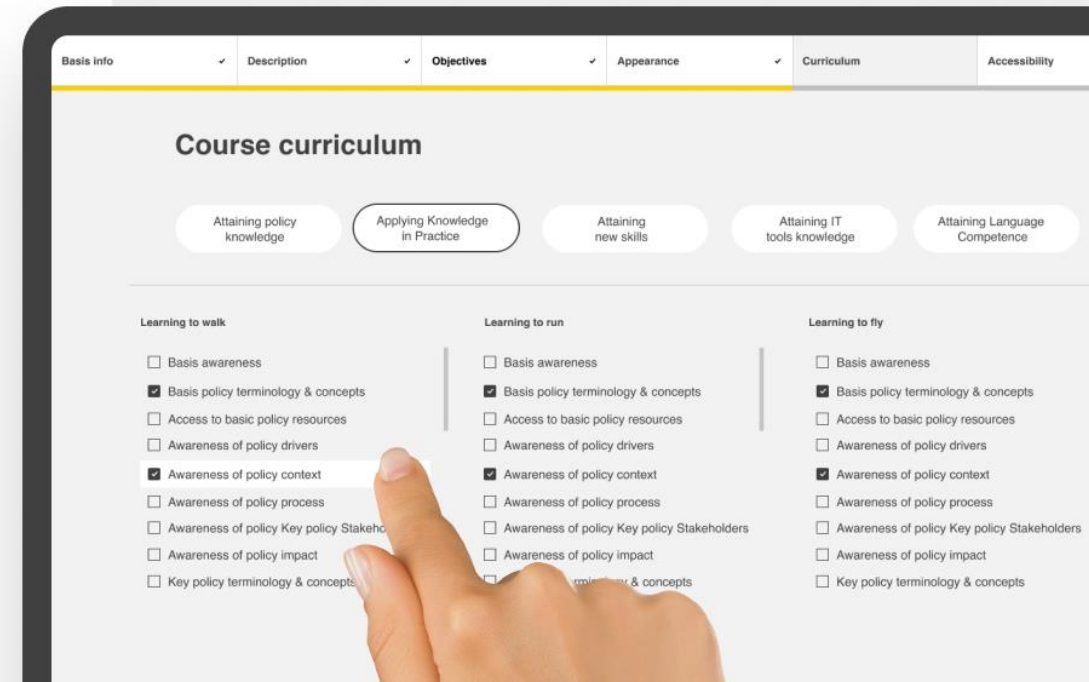

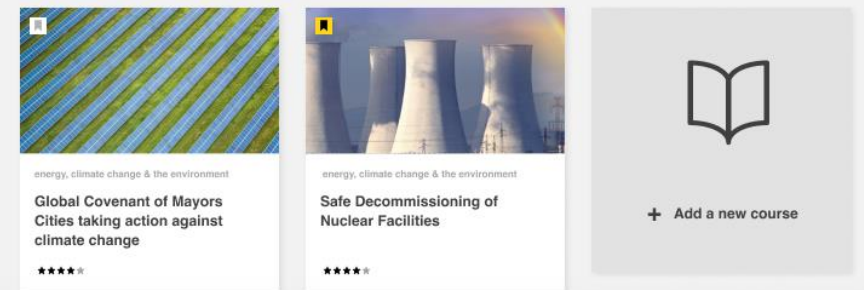

What does the EU Academy offer?

A modern digital training platform

The EU Academy offers a simple, smart and user friendly learning environment. In the platform, learners can find pedagogical content produced directly by the EU Institutions and/or their trusted partner organisations revolving around EU programmes, projects and policy.

The educational content hosted on the platform targets upskilling and reskilling opportunities for professionals – in a broad sense, including students, researchers, policy-makers, practitioners, etc. - whose work is related to the sphere of action of the EU, as well as citizens who have a stake in EU policy making.

Visitors from all over the world

The platform is proving to be both a useful practical tool for skills and competency development on EU matters of known EU stakeholders in Member States and regions, as well as a tool able to reach new audiences at the global level, many of which are exposed for the first time in a direct manner to EU know-how, policies and programmes.

How could the platform serve your organisation?

Enabling new audiences

E-learning, e-training and virtual events are an integral part of the present (and the future) of learning. In this context, online courses, events, podcasts and video talk channels available on the EU Academy platform facilitate deeper relations with your current stakeholders and open a door towards new audiences, enabling greater understanding of EU policy and programme work, and leading to new collaborations and co-creation of opportunities in all policy areas.

Full user experience

The EU Academy offers a professionally run and beautifully designed platform and user experience, with high quality content in support of EU policy and programme development and implementation goals. This content is signed by the EU.

Are there any costs for using the platform?

Learners can use the EU Academy for free. The only thing they are required to do is create a user account. After that, they can start browsing the catalogue of available courses immediately. Certificates of completion are available for the majority of the courses.

EU services wishing to use the platform to host their pedagogical content are asked to sign a Service Level Agreement with the Joint Research Centre. This Agreement sets out the modalities of use of the platform.

How can I help?

If your organisation is interested in promoting the EU Academy and the courses available on it, please reach out to Sebastián Moreno Barreneche, the EU Academy Communications Manager for support materials in your language and more information. If you are interested in creating a course, contact Paul Hearn, the EU Academy Business Manager.
