The European Union

by 2050

-55% by 2030

- On 14 July 2021, the European Commission adopted a set of proposals to make the EU's climate, energy, land use, transport and taxation **policies fit for reducing net greenhouse gas emissions by at least 55% by 2030**, compared to 1990 levels.
- Achieving these emission reductions is crucial to Europe becoming the world's first climate-neutral continent by 2050 and making the European Green Deal a reality.
