

Conflict Minerals Compliance

Suppliers are expected to supply materials to **EI-Supply AB** that are “DRC conflict-free.” “DRC conflict-free” means any “conflict minerals” (gold, columbite-tantalite, also known as coltan, cassiterite, wolframite, or their derivatives tin, tantalum or tungsten (collectively the "3TGs")) necessary to the functionality or production of supplied materials do not directly or indirectly finance armed groups through mining or mineral trading in the Democratic Republic of Congo or an adjoining country, or any 3TGs in supplied materials are from recycled or scrap sources. Suppliers are expected to adopt policies and management systems with respect to conflict minerals and to require their suppliers to adopt similar policies and systems.

EI-Supply AB suppliers are expected to pass the CMRT public Conflict Minerals Reporting Template (link below) to their suppliers and successively upstream until the smelter/refiner is identified. The survey information must then be passed back down through the levels of the supply chain to **EI-Supply AB's** direct supplier. Template linked from RMI website.

CMRT public [Conflict Minerals Reporting Template](#) for use by **EI-Supply AB's** suppliers with their supply chain.

EI-Supply AB are since June 2003 certified according to ISO9001 and ISO 14001.
