[ made of gotland ]

We use raw material and manufacturing that is local, to create sustainable quality products. A collection for daily life – for you and your home.

[ raw material ]

Wool has a number of fantastic material qualities – it's renewable, moistureproof and has flame retardant properties. The grey Gotlandic wool is unique with its long silver grey soft shiny curls. Our wool is cut twice a year and spun at a local spinners on Gotland to a yarn quality needed for our products. The grey shades come from the Gotland Pelt whereas the white wool is Leicester and Swedish fine wool – the sheep all grazing the Gotland pastures.

Sheep in the fields

### [ the manufacturing ]

The production takes place locally in our cottage industry, on the Swedish island of Gotland. It consists of hand-knitted, hand woven and woven products made by experienced artisans out of 100% Gotlandic wool. The wool comes from sheep grazing the fields, maintaining the open landscape and biodiversity of the island.

### [ about us ]

We are eldblå – Karin Kloth and Anna Josefin Hagberg. Together we have been working with the collection made of gotland since 2016. We came together through our mutual fascination for wool as a material. Its characteristics are present in every product of the collection.

[ knitted products ]

The characteristics of the wool is what interest us. The structures of the knitted material, each mesh and its density creates different structures that shapes each product. This, together with the natural colours of the wool and its luster and how the light works on these surfaces, is what we look for. Whether it's a voluminous shape of a blanket being used, a throw wrapped around someone or a silhouette of a shawl being worn – the qualities of the material and the simplicity of the straight stitch is always there.

Baby throw / RÄT – small and warm

Throw / RÄT – warm and a little unruly

Shawl rough / RÄT – an embrace  
for icy winter days and cool  
summer evenings

Shawl / RÄT – soft and warm

Scarf / RÄT – elegant and pliable

Wool is a renewable raw material - a sustainable choice.

[ colours ]

The range of shades of the products derives from the natural colours of the wool – white, grey and anthracite.

[ care ]

Wool has a lovely natural scent. This scent gradually fades over time as you wash and care for the product. Keep your garment fresh by airing it from time to time. As well as being naturally stain resistant, wool garments are also odour resistant, so washing may only be required occasionally. When washing – by hand or in a machine on wool cycle – use a mild wool detergent. When drying, please let it flat dry.

Pad square / RÄT – small and warming

Pad long / RÄT – long and warming to sit on

[ woven products ]

Our hand woven carpets with its plain construction and precise lines as design let the wool fibres reflect light to its surroundings. The simple and close construction makes it lay stable and flat.

The blanket gives a smooth and cherishing experience with its structure and quality. It is generously cut, each side a block of one colour, with delicate fringes on two sides. Winner of the Formex Formidable People's Prize 2017.

Blanket / UPP & NED – smooth and generous

Carpet / SAND LINE – a precise single line is the essence

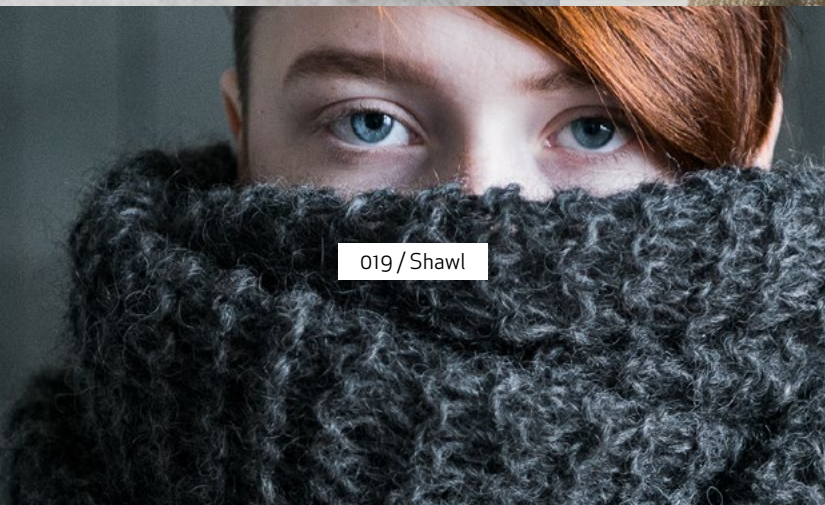

016 / Baby throw

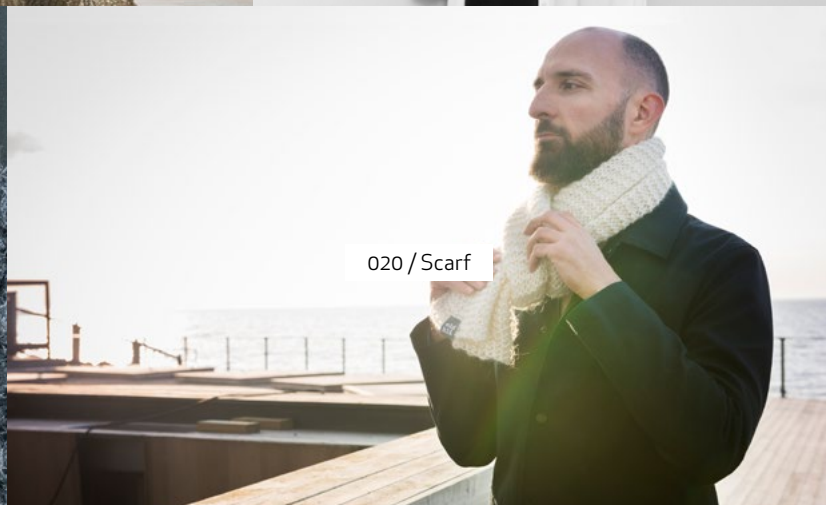

017 / Throw

018 / Shawl rough

019 / Shawl

020 / Scarf

021 / Pad square

022 / Pad long

023 / Bag pad square

024 / Blanket

025, 026, 027 / Carpet
