

# New generation of weed burners

Based on our many years experience with the construction and manufacturing of weed burners, we have developed a new generation of machines with focus on high energy efficient and low CO<sub>2</sub> emission.

## Advantages:

- Low noise
- Energy efficient – average reduction of gas consumption: -40%
- Low CO<sub>2</sub> emission

In other words our new generation of weed burner meet the demands of tomorrow according to the working and surrounding environment.

## Specifications:

- Propane consumption: 6 kg/h.
- Working speed: approx. 4 km/h.
- Working width: 50/100 cm (or according to customer demands)
