

Fast delivery times

Quality at a fair price

Special dimensions possible

Construction in ONE minute

Standard model without hatch.

Protective Screen with or without hatch on request.

CORONA- PROTECTIVE SCREEN

"It's what's behind that counts..."

Flexible protection for all relevant professions!

Avoiding direct contact with others, that is our top priority right now. However, there are professions that keep our society going. That is why we would like to support professional groups with our FRANK Corona Protective Screen that can be used on all kinds of counters, desks etc. The display offers an optimal protection (on both sides) - with or without Pass-through hatch - for pharmacies, medical practices, hospitals, supermarkets, self-employed or offices. The displays are made of transparent acrylic: stable, unbreakable and light.

Moreover, the system is easy to assemble and disassemble and is delivered standard with two angles to ensure stability (if needed).

Delivery times: at short notice, on request

Facts:

- Demountable, ideal for easy storage
- Quality product "made in Germany"
- Efficient and long lasting
