Flexible protection for all relevant professions!

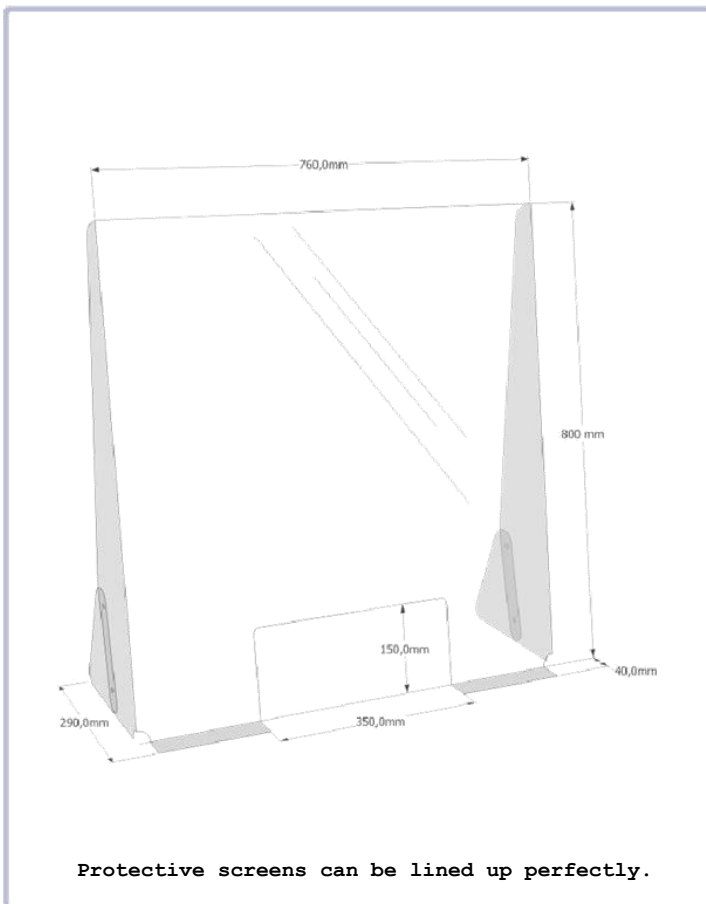

Avoiding direct contact with others, that is our top priority right now. However, there are professions that keep our society going. That is why we would like to support professional groups with our FRANK Corona Protective Screen that can be used on all kinds of counters, desks etc. The display offers an optimal protection (on both sides) - with Pass-through hatch - Ideal for pharmacies medical practices, hospitals, supermarkets, self-employed or offices. The displays are made of transparent PET-G or acrylic: stable, unbreakable and light.

Cleaning:

Dirt can hardly stick to the poreless surface of acrylic glass. The protective screen can be easily cleaned with household detergent and water. Use a soft, lint-free cloth. The screen should never be cleaned dry. PET-G can be cleaned with disinfectants.
