

## Claudia Pia

UX og Produktdesigner, MSc

I'm an enthusiastic designer and outdoor lover.

I completed my Bachelor's in Product Design and my Master's in Design & Engineering at Politecnico of Milan, graduating with full marks.

In 2019, I moved to Norway to finish my studies and began working at FDB as a product and digital designer. My role here has involved tasks such as CAD modeling, web design, product branding, and UX design for our monitoring systems.

I've also been a WP leader for the European project AFC4Hydro, where I've managed and updated their website and social networks, creating and sharing new content—including videos, photos, newsletters, illustrations, and animations.

### Work Experiences

► UX & Product Designer, Flow Design Bureau (2024 -> present )

► Product Developer, Barents Outdoor (2023 – 2024)

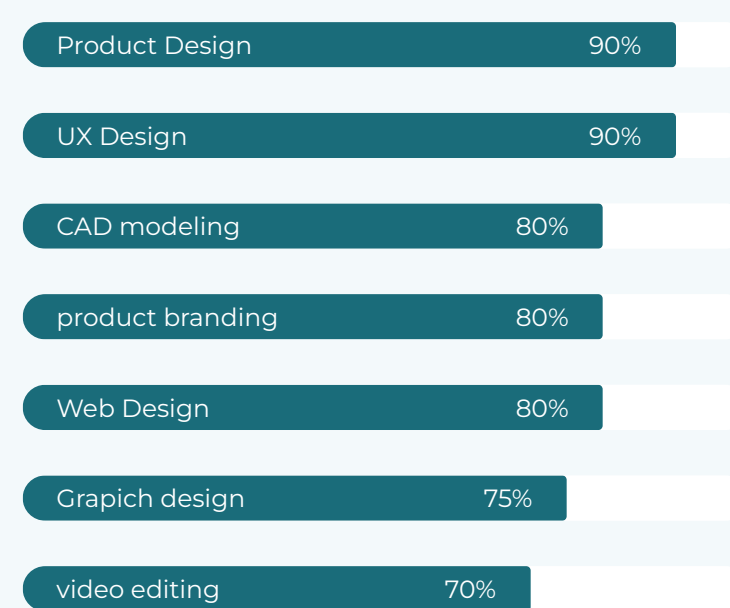

► UX & Product Designer, Flow Design Bureau, AFC4Hydro (2020 – 2023)

### Education

Master of Science in Design & Engineering, Politecnico of Milan (2017-2019)

Bachelor's Degree in Product Design, Politecnico of Milan (2014-2017)
