VALUES

SUSTAINABILITY

**SUSTAINABILITY IS PART OF OUR
COMPANY CULTURE AND EVERY
PROJECT.**

We are driven by a continuous desire for finding new and better ways of serving our markets – while still promoting a mind-set of contribution towards environmental improvement.

- Ensure that all employees have focus on high-quality and product safety in all aspects and are up to date on all applicable goals and values.
- Deliver the correct product at the agreed time, while continuously improving quality and services.
- Identify and evaluate potential risks.
- Meet all relevant customer requirements in compliance with all legal and regulatory procedures as well as standards for procurement of services, products, and tasks.
- Work to achieve a high level of satisfaction with all stakeholders.
- Contribute actively to ensure the best possible employee training and development, this including fulfillment of current policies and goals and is also expected of our agents.
- Proactively review processes to ensure corrective actions are taken to address any discrepancies

ZERO-CO2 FOOTPRINT BY 2030

- We take our commitment to reducing Freebee's environmental impact very seriously.
- Freebee has launched a CO2-neutrality initiative.
- By investing in green energy, we will offset all CO2 emissions generated throughout every aspect of our business by 2030.
- Our progress is split into the five phases and Freebee is already two years ahead of schedule, continuing to push forward at full speed.

THANK YOU

FREEBEE
