I-ELITE SYSTEM

oxytap™

ONE MACHINE

THREE SHOTS

ENDLESS HEALTH POSSIBILITIES

THE WORLD'S **FIRST** OXYGEN SUPPLEMENT INFUSER

DISCLAIMER

The Oxytap is not a medical device, and the manufacturer does not provide medical advice. Users understand that the device is not intended for medical or diagnostic purposes. Its use should not replace reliance on medical treatment or advice from a qualified healthcare provider. Users acknowledge using the Oxytap at their own risk.

Always consult your doctor or other healthcare professional with any questions about a medical condition or for specific guidance regarding the optimal use of the Oxytap, nutrition, or physical activity.

A GLOBAL PROBLEM

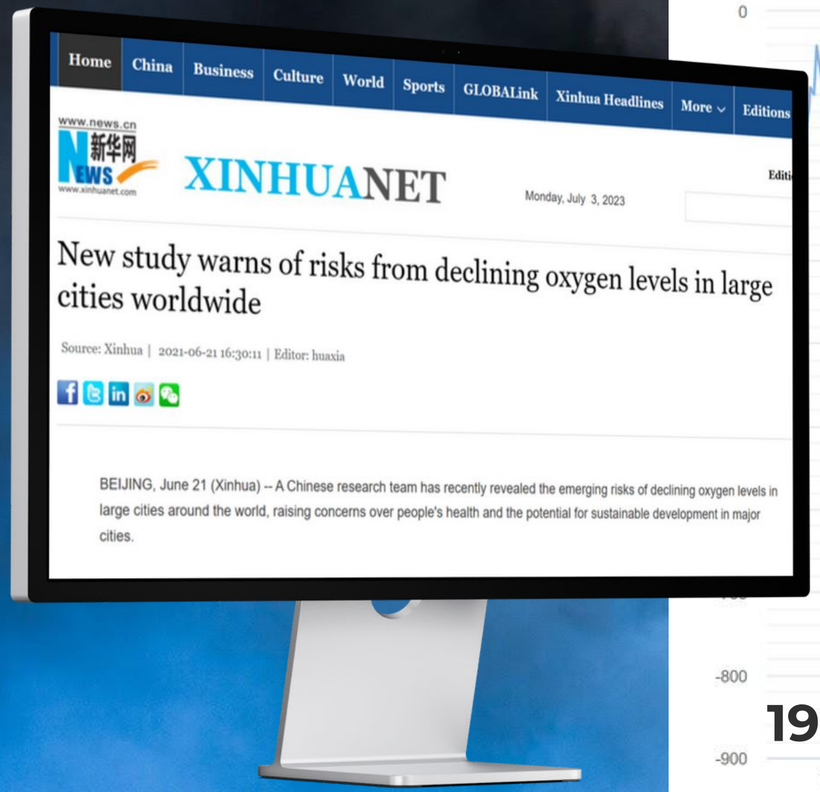

Oxygen Pandemic

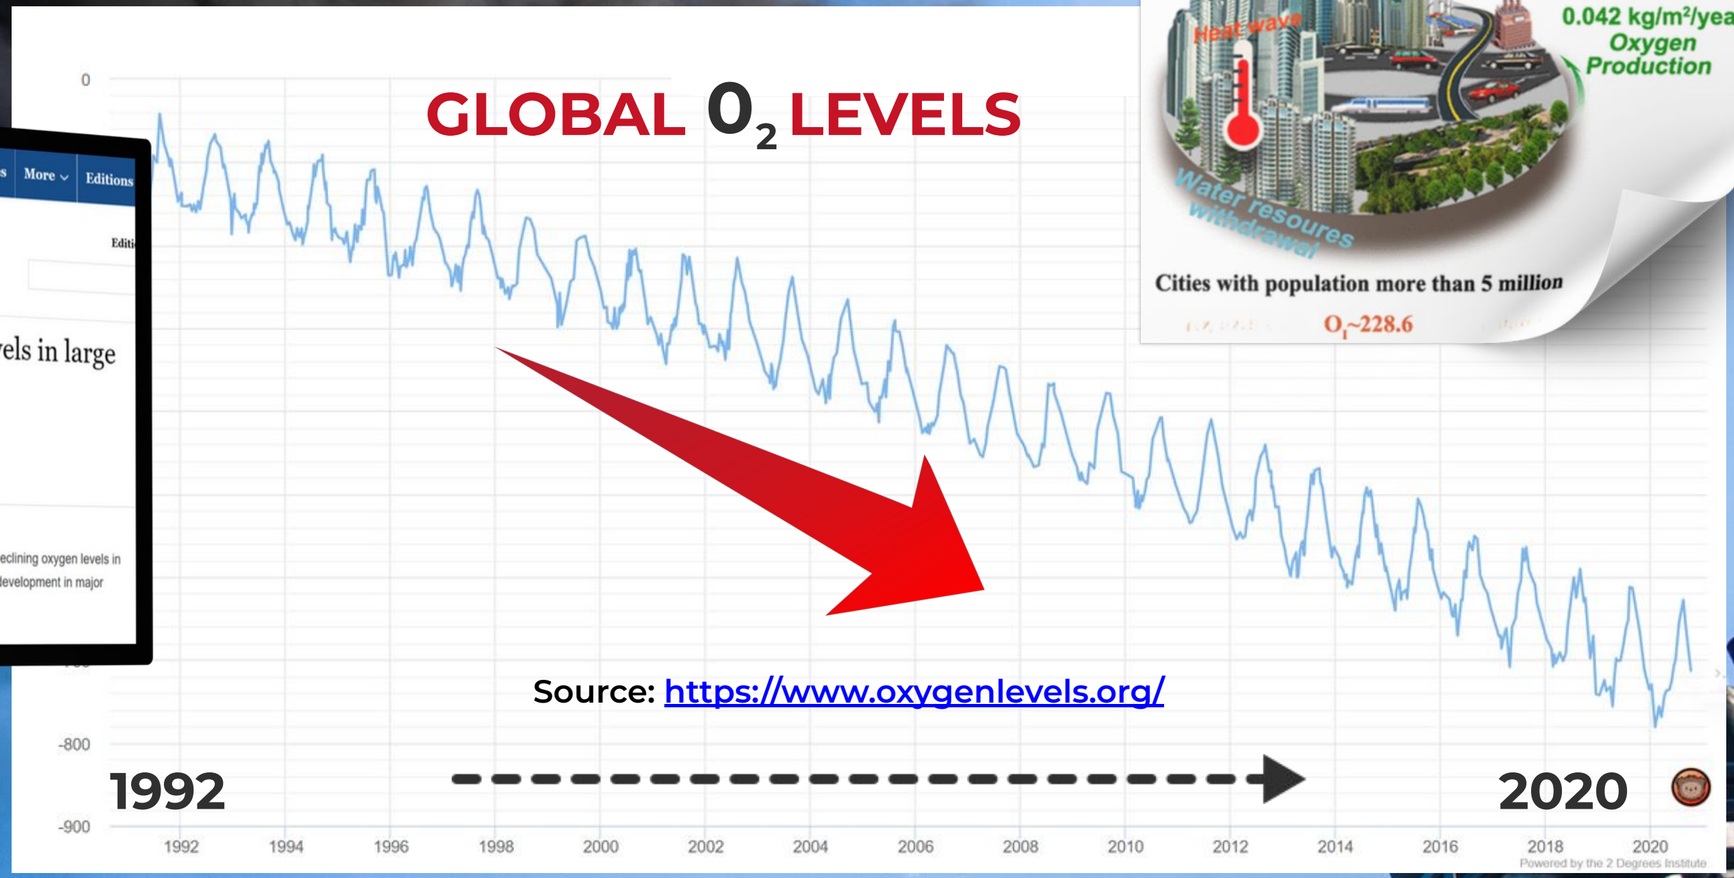

Health Problems

OXYGEN PANDEMIC

Today, atmospheric oxygen levels are gradually decreasing because of two main factors: the burning of fossil fuels, which consumes oxygen, and deforestation, which reduces oxygen production.

Source: https://www.oxygenlevels.org/

HEALTH PROBLEMS

60% of health problems (sickness and diseases) are linked to **Hypoxia** (lack of oxygen).

- Body Aches
- Insomnia
- Low Energy
- Cancer
- Diabetes
- Dementia
- Arthritis
- Inflammation
- Concentration & Focus
- Myopia
- Eczema
- Asthma

No oxygen = Mitochondria cannot produce energy

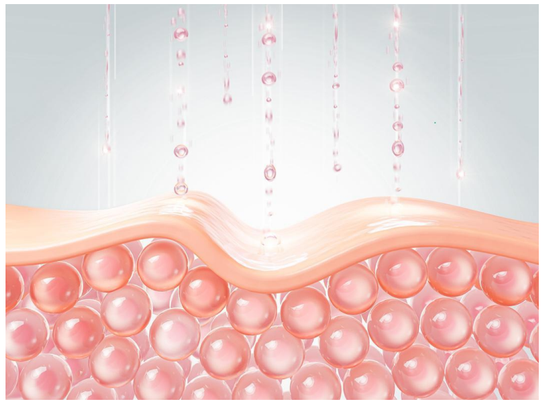

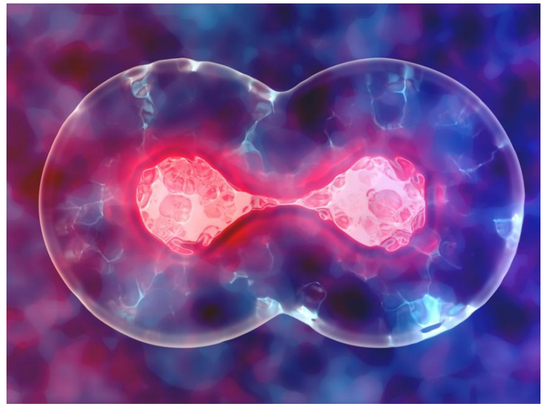

Oxygen is important in body cells (preventing tissue hypoxia)

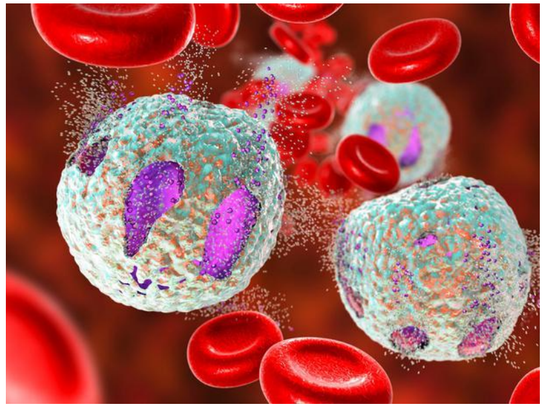

CELLS NEED HIGH ENERGY (ATP) FOR MANY FUNCTIONS:

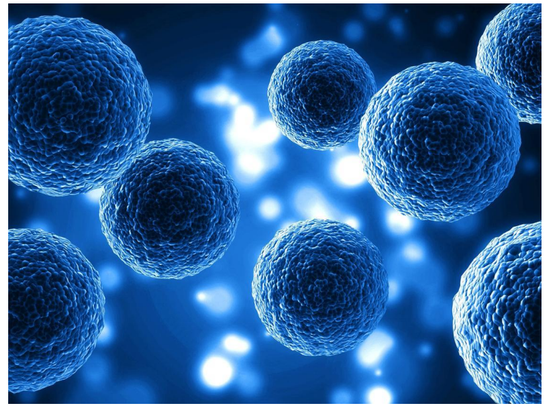

REPAIR of cells after injury

Keep the cells **YOUNG AND ALIVE**

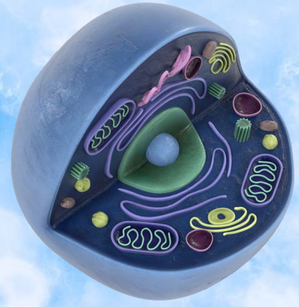

Fight **INFECTIONS**

Carry out normal **CELL FUNCTIONS**

Oxygen is closely related to the energy economics of a cell.

mitochondrion
- super power generator

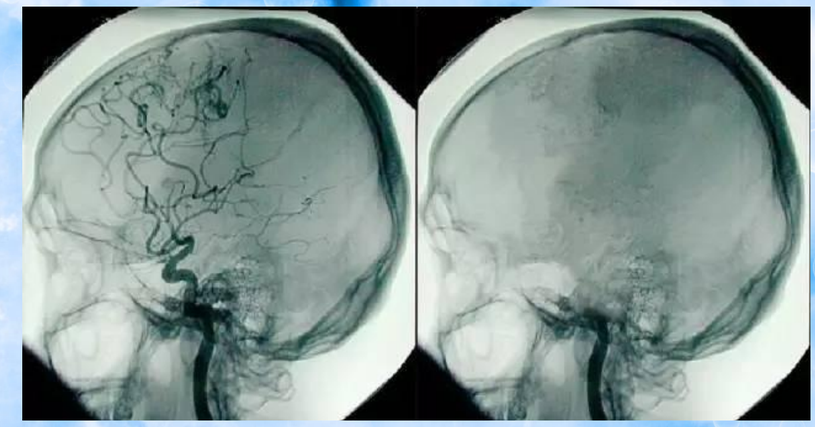

Oxytap™

I-ELITE SYSTEM

A person can survive without drinking water
for 2 days, without eating for 7 days,
but cannot survive a moment without OXYGEN.

Our brain consists of over 80 billion neurons. These brain neurons keep working continuously, constantly controlling and adjusting our thoughts, speech, and actions. It constitutes only 2% of the body's weight but consumes 20% of the blood oxygen supply. The brain's blood oxygen reserve is very low due to the extremely limited space within the skull. As a result, **even a brief complete cutoff of blood supply for 3-5 minutes causes irreversible death of brain neurons. Just a few seconds of oxygen interruption can cause the brain to crash, leading to fainting.**

YOU CAN INCREASE THE OXYGEN BY:

Hyperbaric Chamber

- Expensive
- Complicated
- Dangerous!

There are risks of hyperbaric oxygen therapy because of the increased pressure and increased concentration of oxygen during HBOT. Potential risks include: Ear and sinus pain, Middle ear injuries, Lung damage, Temporary vision changes, etc.

Oxygen Concentrator

- Inconvenient
- Inappropriate adjustment of oxygen concentration could lead to oxygen toxicity!

The MOST EFFECTIVE, FASTEST & SAFEST Way to Feed Your Body with OXYGEN --

OXYGENATED WATER !

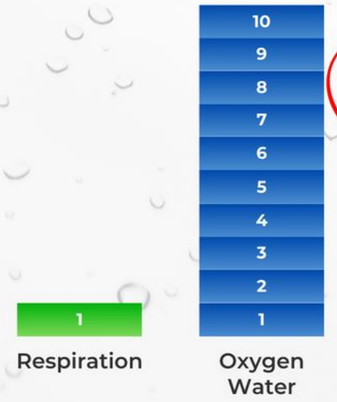

PROVEN EFFECTIVE !!

Supported by experiments and scientifically proven / Dissolved oxygen in water is beneficial to our health

Increase oxygen levels in the blood vessels

by drinking 350 ml of oxygenated water.

Drinking oxygenated water prevents and improves high blood pressure by addressing the underlying causes of increased blood pressure and maintaining it within a normal range.

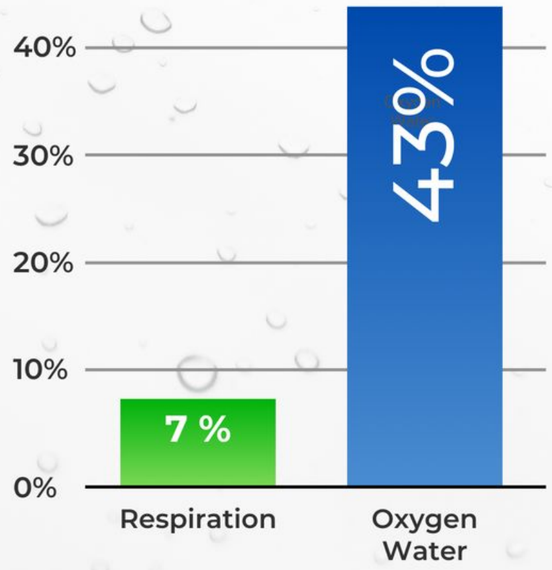

10 times

faster oxygen absorption in cell.

Oxygen from oxygenated water is absorbed into cells 10 times faster than through breathing.

Dr. Zoital. Literary Review of oxygen therapy. (June, 1992)

6 times

higher oxygen absorption in liver.

Oxygen from oxygenated water is absorbed into liver cells 6 times faster than through breathing.

Dr. Zoital. Literary Review of oxygen therapy. (June, 1992)

Oxytap™

THE GAP

There is **no readily available** oxygen supplement

UNTIL...

i-ELITE SYSTEM

Oxytap™

I-ELITE SYSTEM

Now, we have the **best solution** to **CLOSE THE GAP!**

Oxytap™

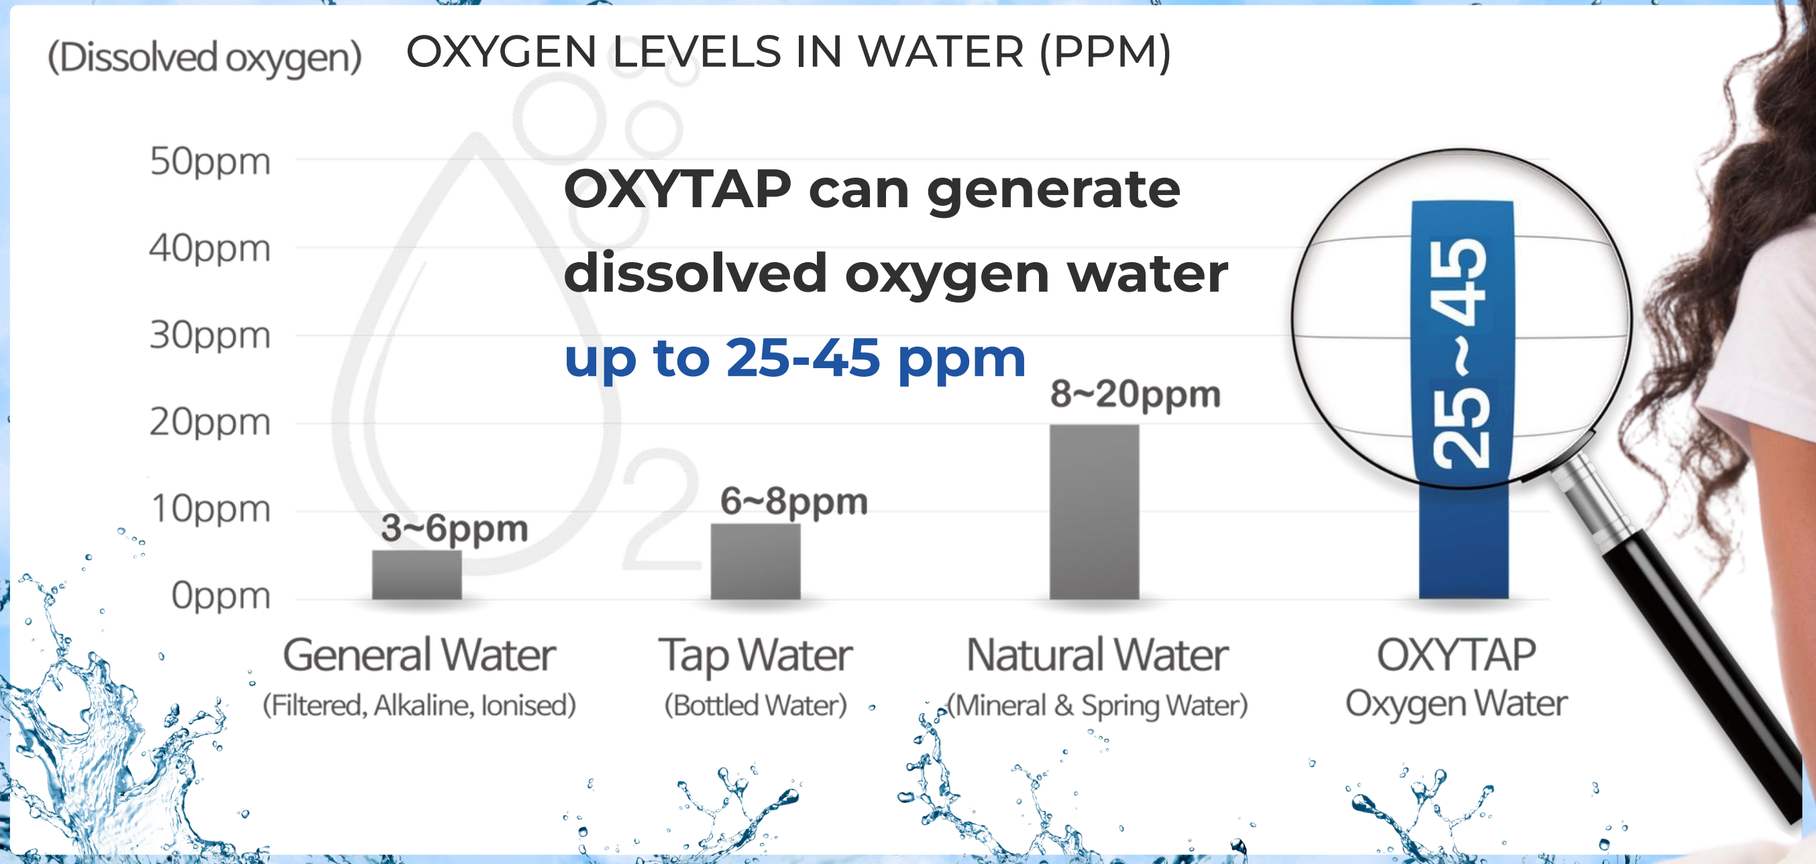

The World's **First** Regenerative Oxygen Supplement Infuser

- **Light and Compact**
- **Proven Effective**
- **Affordable yet High Value**

WHAT IS FRESH WATER?

Full of Dissolved Oxygen between 8-20 ppm (parts per million) oxygen concentration in water.

OXYTAP can generate dissolved oxygen water up to 25-45 ppm

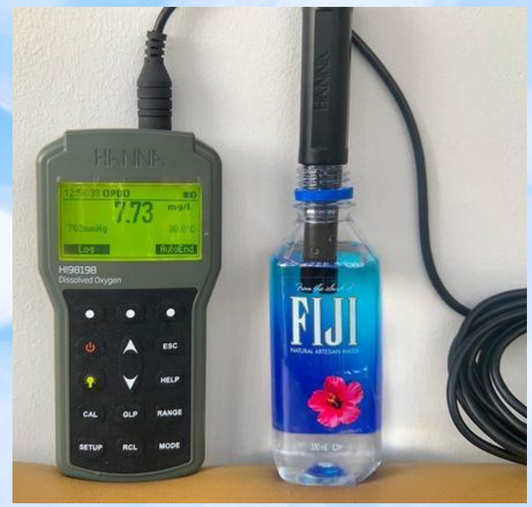

OUR FAVOURITE BOTTLED WATER BRANDS

- **Shelf life is 2 years** from date of manufacture.
- **Dissolved oxygen leaves the bottle** once bottled from source.
- After **8 –12 months,** dissolved oxygen in bottled water is **less than tap water**.
- Low dissolved oxygen in water makes the water **unhealthy and stale**.

7.41 ppm of dissolved oxygen left in water.

7.73 ppm of dissolved oxygen left in water.

8.01 ppm of dissolved oxygen left in water.

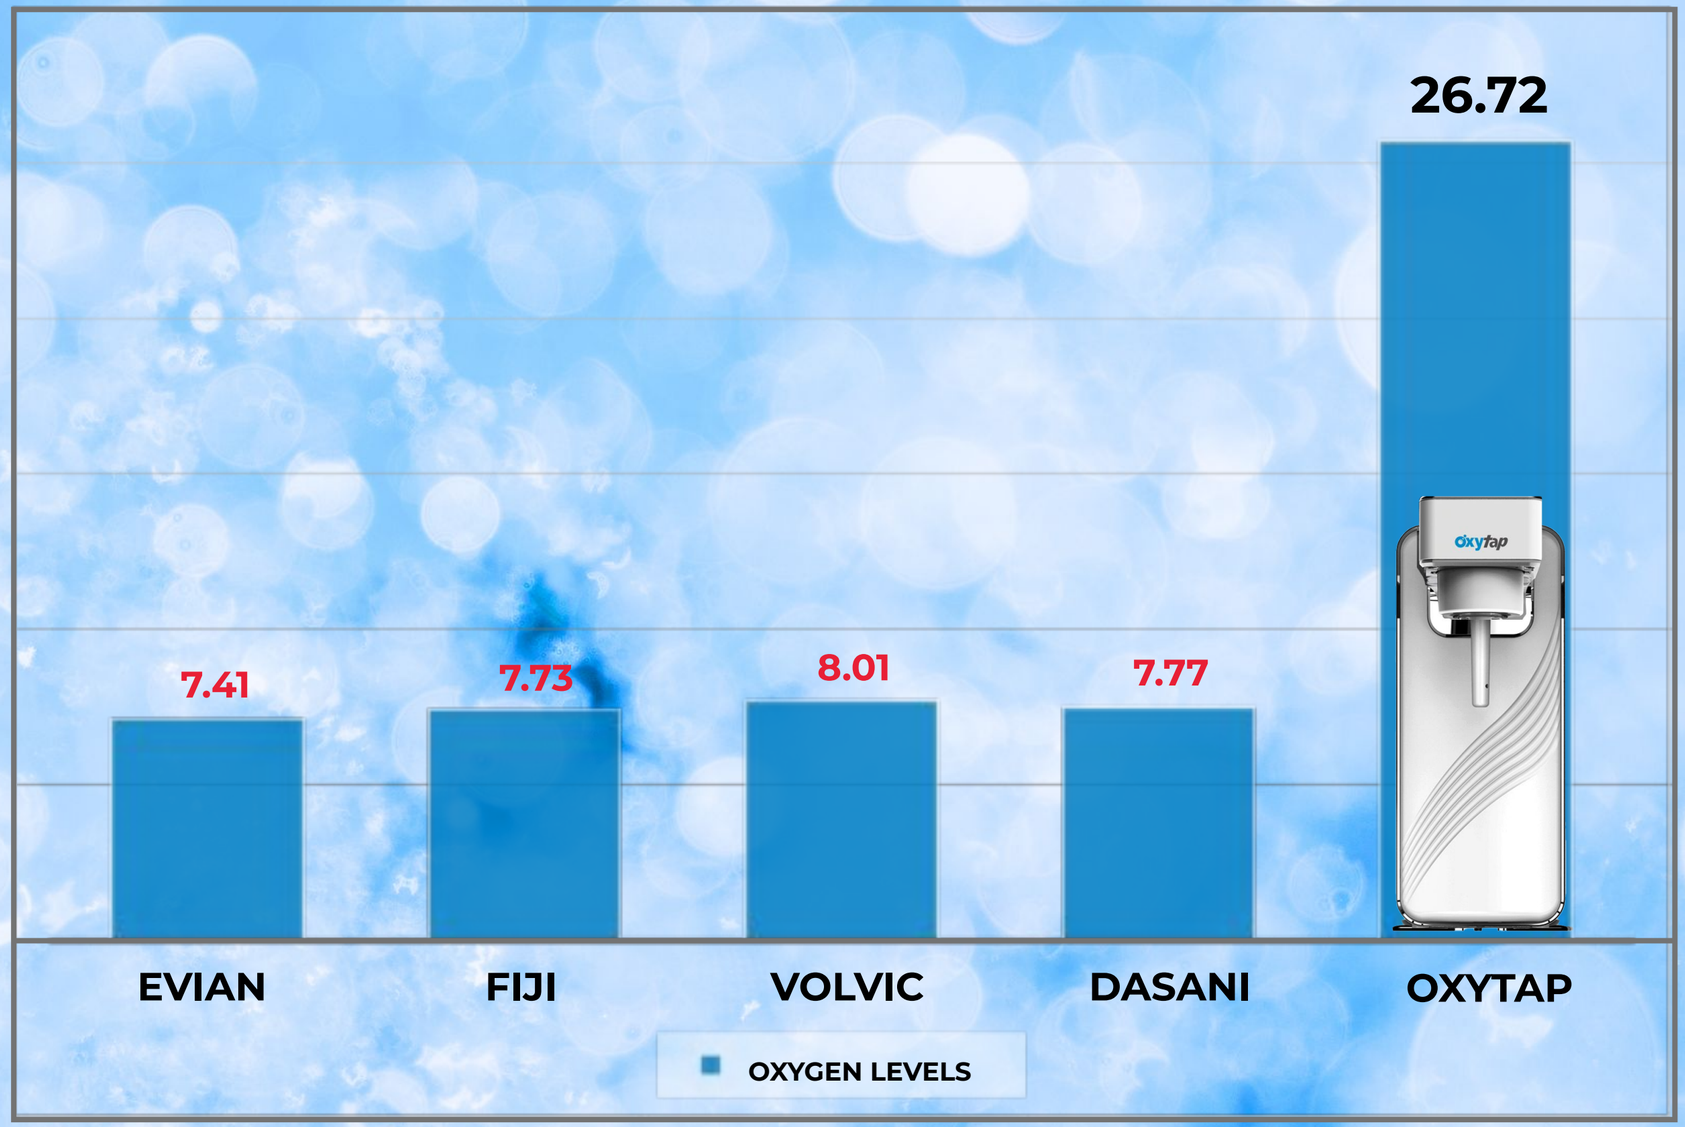

7.77 ppm of dissolved oxygen left in water.

WATER FRESHNESS LEVEL

Amount of Fresh Dissolved Oxygen

THE FRESHEST WATER DONE SUSTAINABLY

Oxygen infused from the source

SECONDARY PUMP

Oxygen is then infused into the water through a second pump, creating an Oxygen-enriched water

PATENTED DUAL PUMP SYSTEM

Sucks the water up through the nozzle

fast-charging titanium oxygen generator

Water molecules (H20) are split into oxygen, hydrogen, and a little ozone. The generator then filters away the hydrogen and ozone, leaving behind pure oxygen stored in its internal tank.

OF VALUE AND AFFORDABLE

Good health is priceless, and investment in Oxytap offers endless health possibilities and a high quality of life.

MULTI-APPLICATIONS: CUSTOMISABLE 02 CONCENTRATION

REFRESH

3 minutes O2 Supplement Infusion.

> 25 PPM of dissolved Oxygen for a Crisp Refreshing Taste

REENERGISE

6 minutes O2 Supplement Infusion.

> 30 PPM of dissolved O2 for the Nurturing properties of Nature

REVITALISE

9 minutes O2 Supplement Infusion.

> 35 PPM of dissolved O2 for the Nurturing properties of Nature

REFRESH

SINGLE SHOT

FRESH WATER IN A SINGLE SHOT

3 minutes O2 Supplement Infusion.

> 25 PPM of dissolved Oxygen for a Crisp Refreshing Taste

Indulge in the purity of fresh water; a single shot from Oxytap infuses your water with oxygen, mirroring the essence of natural spring water. Refresh yourself with the crisp taste and enjoy the invigorating benefits right at your fingertips.

Your journey to a sharper mind and renewed energy begins with a single shot from Oxytap—embrace the freshness, embrace life.

FOR:

- Concentration & Focus
- Difficulty Sleeping
- Low Energy Levels
- Nearsightedness

REFRESH

ADVANTAGES OF OXYGEN TO HUMAN HEALTH

CONCENTRATION & FOCUS

The brain is the organ that needs oxygen the most. Using your head consumes a lot of oxygen.

When you're focused, your breathing rate is relatively low, so oxygen intake is absolutely critical. The more you focus, the more oxygen you need.

DIFFICULTY SLEEPING

Adequate oxygen intake is important for various bodily functions, and some research suggests a connection between oxygen levels and sleep.

LOW ENERGY LEVELS

The extra oxygen dissolved in the water may help increase oxygen saturation in the bloodstream and provide more oxygen to tissues and cells. This additional oxygen can aid cellular respiration and energy production.

NEARSIGHTEDNESS

Reduced oxygen levels can potentially impact vision by influencing the crystalline lens and its refractive power.

Inadequate ocular blood flow and oxygenation might disrupt normal eye development and vision regulation, potentially contributing to increased axial elongation and nearsightedness.

REENERGISE

DOUBLE SHOT FOR THERAPEUTIC HYDRATION

6 minutes O2 Supplement Infusion.

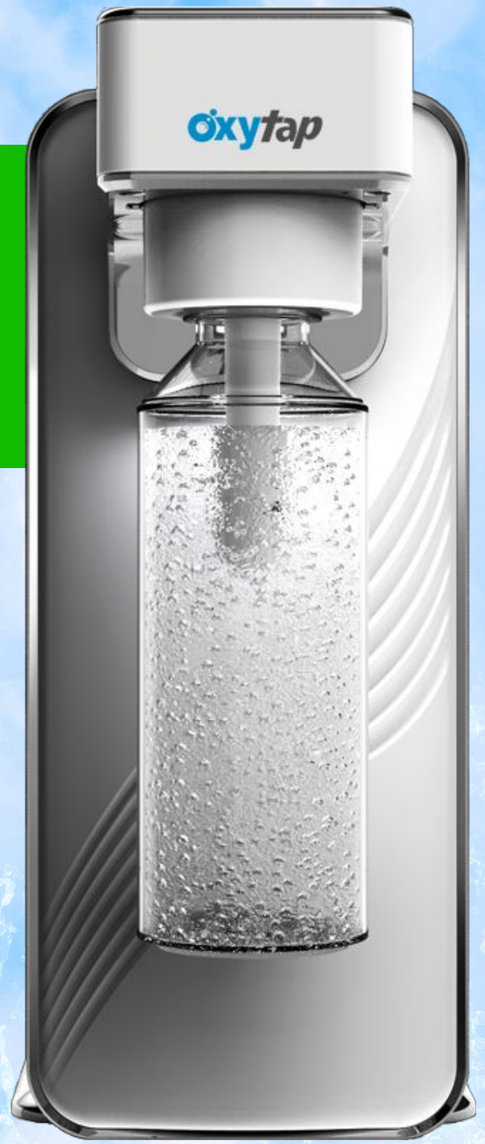

> 30 PPM of dissolved O2 for the Nurturing properties of Nature

Unveil the healing potential of a Double Shot from Oxytap - your doorway to therapeutic hydration. Enveloped in oxygen's nurturing embrace, this mode caters to your unique health needs, offering a holistic approach to well-being.

Reenergise your self-care routine and tap into the potential of healing with every sip of a double shot from Oxytap.

FOR:

- Difficulty Breathing
- Joint Discomfort
- Skin Sensitivity
- Hangover

REENERGISE

ADVANTAGES OF OXYGEN TO HUMAN HEALTH

DIFFICULTY BREATHING

In situations where breathing might be temporarily challenged due to environmental factors or personal sensitivities, maintaining optimal oxygen levels is key.

Drinking 40ppm stable dissolved oxygenated water could support the body's overall wellness by ensuring tissues receive the oxygen they need for normal function.

SKIN SENSITIVITY

"The Root Cause of frequent skin diseases is the lack of oxygen.“
-Professor BARNIKOL, Director of Clinical Physiology at WITTEN/HERDECKE University

When skin cells lack oxygen, they may not have enough energy for natural rejuvenation. Increasing oxygen availability, whether internally or externally, can help support the skin's ability to maintain its

JOINT DISCOMFORT

Supporting Antioxidant Balance: Enhancing oxygen levels may assist in counterbalancing free radicals, contributing to overall joint comfort.

Enhancing Circulation to Joints: Improved blood flow to joint areas can ensure tissues receive the oxygen necessary for maintaining comfort.

Encouraging Tissue Wellness: Elevating oxygen levels could facilitate the natural maintenance processes of tissues, [illegible] joint comfort.

HANGOVER

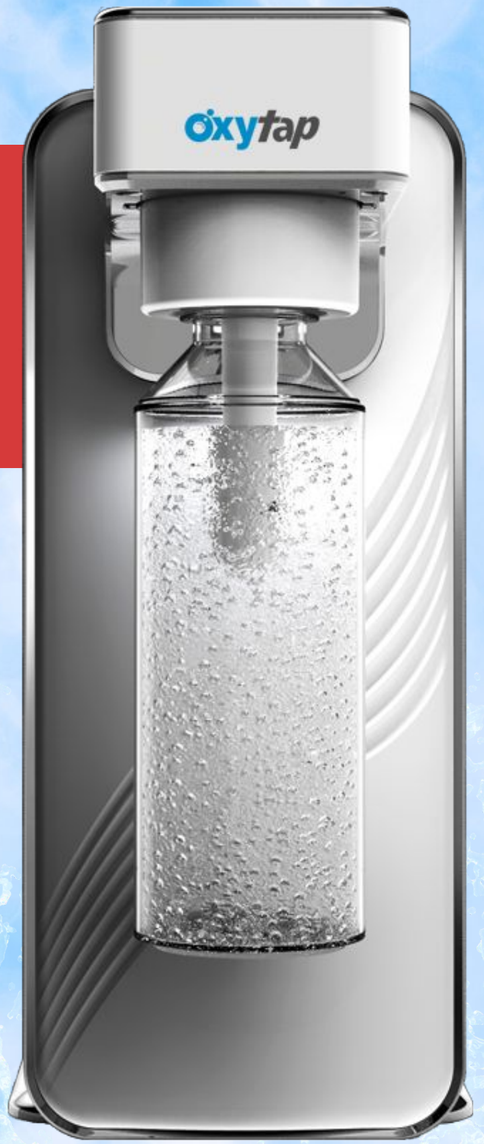

Excessive alcohol consumption leads to the production of acetaldehyde in the body. When the body cannot efficiently process the accumulated acetaldehyde, it can build up in the liver, contributing to hangover symptoms.

Oxygenated water consumption may assist in the breakdown of acetaldehyde, potentially easing hangover discomfort.

REVITALISE

TRIPLE SHOT

FOR MEDICAL GRADE HYDRATION

9 minutes O2 Supplement Infusion.

> 35 PPM of dissolved O2 for the Nurturing properties of Nature

Revitalise with Oxytap's pinnacle - A Triple Shot. Crafted to fortify your body's defenses, this Medical Grade Water offers a shield against potent adversaries. Seize control of your health with the robust benefits of a Triple Shot from Oxytap - a testament to your commitment to Revitalise your thriving life.

FOR:

- Cellular Health Challenges
- Blood Sugar Regulation Issues
- Respiratory Conditions / Post-viral Recovery
- Cognitive Function Decline

REVITALISE

ADVANTAGES OF OXYGEN TO HUMAN HEALTH

CELLULAR HEALTH CHALLENGES

"All normal cells have a requirement for oxygen, but cancer cells can live without oxygen - a rule without exception" Dr Otto H.Warburg, Biologist / Nobel Prize Winner in Medicine

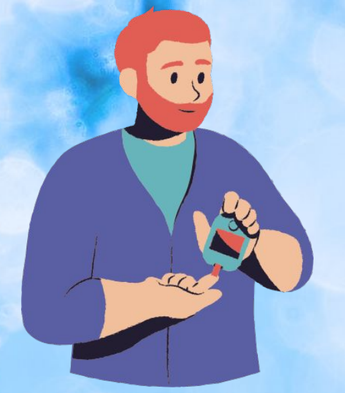

Certain cell changes may be linked to reduced oxygen availability over extended periods. Research findings suggest that oxygenated water may have beneficial effects on conditions associated with cell functions.

RESPIRATORY CONDITIONS / POST-VIRAL RECOVERY

Oxygenated water could potentially enhance oxygen distribution in the body. The oxygen dissolved in the water might assist in easing cellular oxygen deficiency, which is associated with fatigue and symptoms experienced by individuals having post-viral effects, according to some studies.

The stabilized oxygen in the water acts as an antioxidant and may help diminish oxidative stress. Oxidative stress is a natural process in the body that can be influenced by various factors.

BLOOD SUGAR REGULATION ISSUES

Drinking water with more oxygen could boost blood oxygen levels, potentially improving how your body handles glucose.

Additionally, drinking water with high dissolved oxygen levels might also help manage blood sugar levels and reduce complications from imbalances.

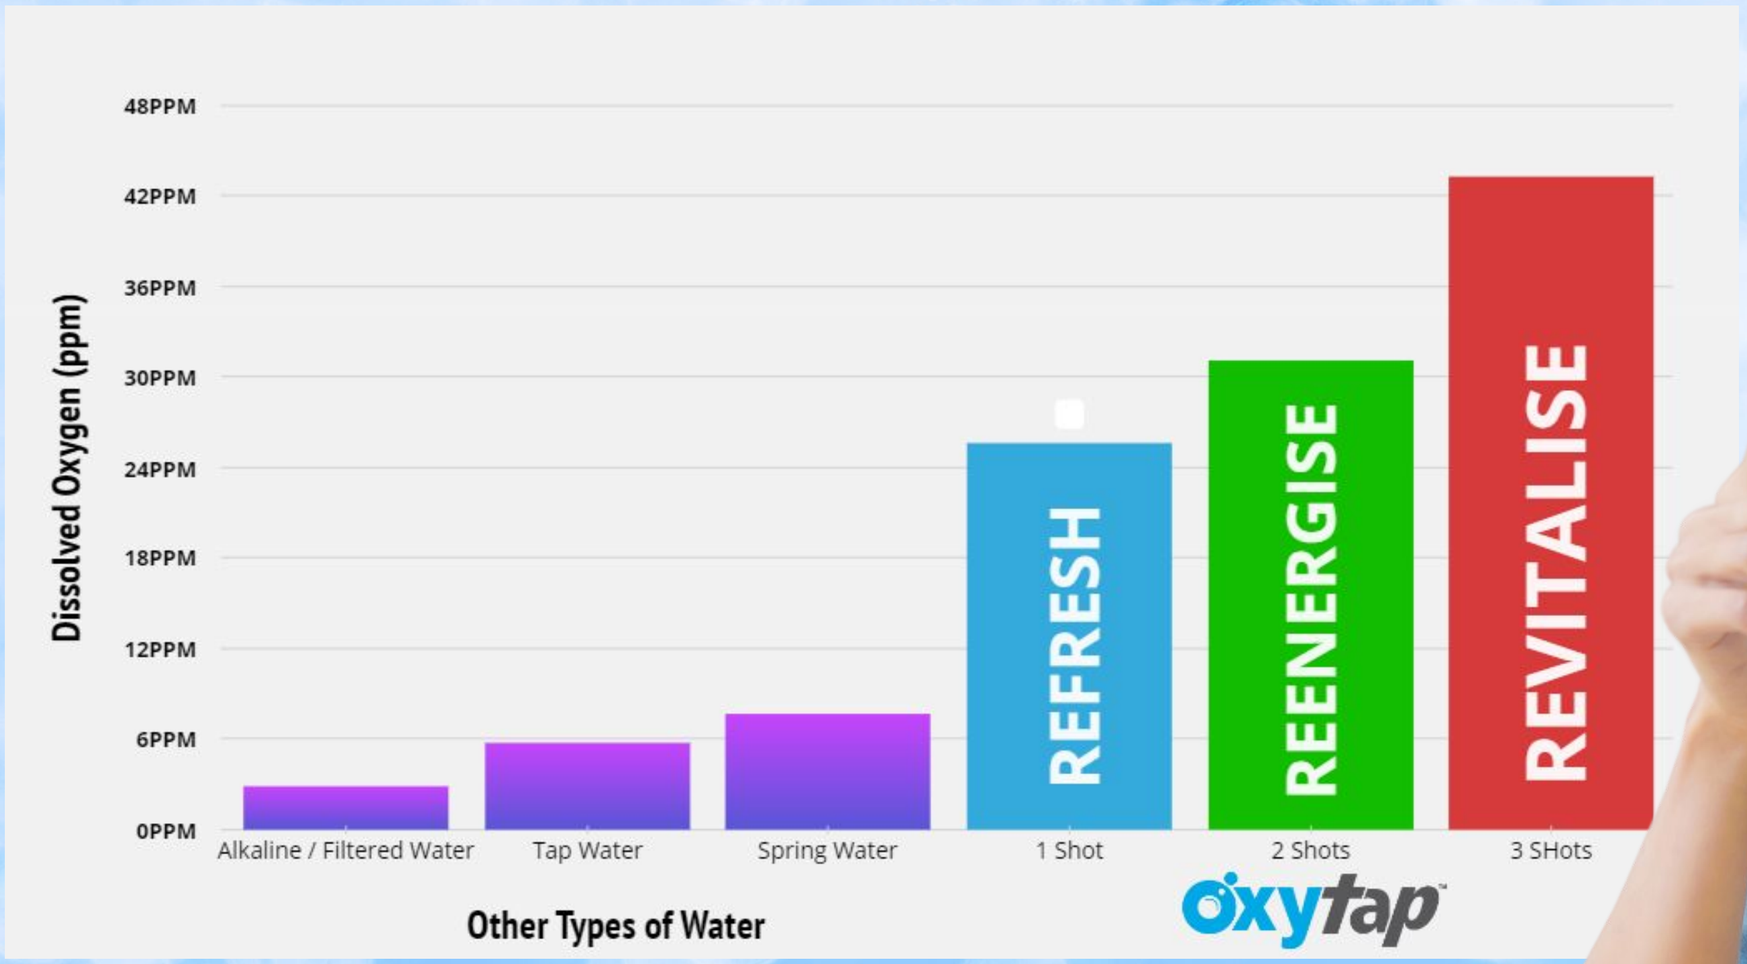

COGNITIVE FUNCTION DECLINE

Maintaining healthy brain function is important throughout life. Some research suggests that inflammation and reduced oxygen delivery may be involved in age-related changes.

Sufficient oxygen supply may be important for healthy blood flow throughout the body, including the tiny vessels in the brain.

PROVEN FACTS
