# Fire Equipment Inspection

---

A fire protection system that is malfunctioning is useless when it comes to putting out fire. Getting your systems inspected regularly can help identify problems and repair them before there is incidence of fire outbreak. This is also important to ensure that your fire protection equipment works in compliance with all applicable standards and regulations when fire breaks out.

Our team of unrivaled expertise offer professional inspections by checking the seals, gauges, hoses and overall condition of your fire extinguisher. This helps to ensure the reliability of your fire extinguisher and also ensures the safety of your employees and your business.

# ISO 9001 Certification

---

We pride ourselves with good and very experienced professionals and we are knowledgeable in all we do. Our team of experts will help you implement ISO 9001 while providing your Organisation with industry best practices.

We are available for any opportunity to serve you in this regard and get your company ISO9001 Certified.

# Lifting Equipment Inspection and Certification

Periodic Inspection of Lifting equipment is basically to ensure that the equipment is safe and fit for use in compliance with statutory requirements.

Our vastly experienced and accredited team offers you unrivaled expertise, experience and equipment to conduct professional statutory and voluntary lifting equipment inspection on lifting equipment such as forklifts, cranes, hydraulic jack & gears, hoists etc. We also inspect and certify Lifting accessories such as Rope Slings, Chains, shackles, belts, safety harness, spreader beams etc in accordance to local and international standards.

# Facility Equipment and Structural Integrity Inspection

---

We conduct routine preventive and corrective maintenance inspection checks on Clients facilities, assets, equipment etc. We have capacity to perform the following services

- ▶ Non - destructive Testing Inspection on laminar and welded surfaces
- ▶ Corrosion control inspection
- ▶ Dimensional Inspection checks
- ▶ Fire Equipment Inspection
- ▶ Pressure testing inspection

*Our vastly experienced and accredited inspectors will help you inspect and analyze the integrity, durability and safety of your structures. You'll find our methods to be accurate, cost-effective, time-saving, hence increasing the uptime of your system*

# Non-Destructive Testing

We deploy cutting edge non-destructive testing (NDT) to help clients stay safe and improve the reliability of their equipment. Our team of certified NDT inspectors are highly trained to carry our NDT procedures in line with global best practices.

Gabson Inspection Services Limited offers the most effective non-destructive testing for a diverse range of industries and ensures defects are detected before they cause serious damage.
